GEN. ROJAS SENDS MESSAGE OF DEFIANCE WARNING U. S.

Situation Tense and Intervention May Be Left to Jud[illegible] of the Officers in Comman[illegible] [illegible]oops

State Historical and Natural History Society

DOUGLAS, Ariz., Sept. 12.—Antonio Rojas, commanding the rebels encamped almost within range of Agua Prieta, and less than three miles from the American border, sent a message of defiance tonight in reply to the warning of the United States military authorities against firing on American territory, according to the messenger sent to him. "If the Americans insist on helping the federals, they must suffer the consequences." This was the reply in substance, which was received by Major Hardeman, of the Fourth cavalry, and turned over to General Schuyler, commander of the department of the west. General Schuyler refused to make any statement regarding the matter.

To the messenger who took the notification from the war department, Rojas said:

"Tell your friends in Douglas to get behind brick walls when they hear the firing begin. We aren't going to look where we shoot."

Guns Trained on Agua Prieta.

The messenger reported that Rojas had three cannon and that an order to move them forward in position to attack Agua Prieta was given while he was present. When he delivered the notification to Rojas, the latter replied, according to the messenger:

"This is the most valuable document I have ever received—it recognizes the belligerency of the rebels."

The situation here is regarded as the most critical since the beginning of the revolution and many expect early intervention. Nearly the entire force of cavalry including the squadron of the Ninth, which arrived last night, is being used in guarding the border tonight. A large force is stationed at the American custom house.

Alarming reports were received tonight from El Tigre, where an attack by the combined forces of Salazar and Alanis is threatened. Alanis and his band of about 600 came up from the south and were reported as being within 20 miles of the camp this afternoon. Consul Dye is making strenuous efforts to have aid sent to the camp in order to protect the 75 Americans, including six women, who have been unable to leave.

Just at dark a number of shots were fired near Agua Prieta and it was believed that the rebels had fired upon the federal outposts. Apparently there was no reply. The coming of the rebels created intense excitement and much surprise, as it was not supposed that Rojas' force which numbers not more than 800 men, would attack the superior force of federals now garrisoning Agua Prieta. The federal force which arrived today brought three mountain howitzers, three Colt's automatic guns and nearly a million rounds of ammunition.

One Federal Reported Killed.

General Schuyler, commander of the department of the west, arrived here tonight to take personal charge of the United States forces on the border. It was reported tonight that a federal soldier was killed when rebels fired on the federal outpost tonight.

Urgent telephone messages were received today from El Tigre mine asking for federal troops to protect the 75 Americans there from an expected attack by Salazar. American Consul Dye made a formal request for federal troops of General Sanjines but the latter gave the consul no definite reply.

Americans Fear an Attack on Nogales

NOGALES, Ariz., Sept. 12.—Intense excitement prevails tonight at Nogales, Sonora, across the line from here owing to reports that the rebels under Emilio Campa would attack the town before morning. Great anxiety is felt on the American side because of threats of retaliation on Americans by the rebels because of the transporting of federal troops over American soil.

The garrison at Nogales comprises but 100 men and the reinforcements from Juarez are not expected until tomorrow morning.

The American consul here has sent a warning to Americans at Magdalena of probable acts of reprisals on the part of the rebels.

WARNED NOT TO SHOOT INTO U. S. TERRITORY

WASHINGTON, Sept. 12.—Major General Wood, chief of staff, today instructed army officers at Nogales and Douglas, Ariz., to notify the Mexicans both federal and insurgent, that they would not be permitted to endanger American life and property by directing their rifle fire into American territory.

If the warnings were disregarded by the Mexicans, the American commanding officers may act at their own discretion. The arrival of Mexican federal reinforcements at the threatened points, it is expected, will result in the withdrawal of the menacing rebel forces to the southward.

CALEXICO, Cal., Sept. 12.—Nothing is known here of an alleged invasion of Mexico by 125 armed Americans by way of Mexicali. The latter town is just across the boundary from this place.

Women Carried Off by Mexican Bandits

MEXICO CITY, Sept. 12.—The Zapatistas have been extremely active the last week in their marauding operations in the states of Morelos and Mexico, and today word was received that Emiliano Zapata is concentrating his forces at Alaltizapan, 20 miles south of Cuernavaca, with the announced intention of marching on Cuernavaca, the capital of Morelos, September 15.

Regular traffic on the Cuernava division of the National railways has been suspended indefinitely as the result of Tuesday's attack by Zapatistas on a passenger train 50 miles south of Mexico City. Delayed reports show that nine persons were injured in the attack, one of whom has since died. Two women passengers were carried into the mountains by the bandits. The wife of General Angeles, commander of the federal troops in Morelos, was among the passengers robbed.

A number of employes have refused to man trains on account of the danger of the attack from Zapatistas.

TWENTY-TWO ZAPATISTAS EXECUTED BY FEDERALS

TOLUCA, Mexico, Sept. 12.—Twenty-two Zapatistas, captured yesterday in a battle with federal troops near San Mateo, state of Mexico, were executed today under the terms of the proclamation suspending constitutional guaranties.

John Gill, a British mining man was rescued from a band of Zapatistas and brought to Toluca by Lieutenant Ligbano, who returned today from an expedition into the rebel territory. After having robbed Gill of 1,000 pesos and his clothing, the Zapatistas carried him away.

Century Old Rites and Military Display Attend Funeral of Japanese Emperor

TOKIO, Sept. 13 (Friday)—Funeral ceremonies of the late emperor of Japan, posthumously known as the "Emperor of the Era of Enlightenment" began today amid surroundings in which century-old rites and costumes were mingled with modern military display. From the most extreme points of Japan subjects have been assembling in Tokio. At midnight great crowds had gathered lining the route of the procession.

Official representatives of every country have come to Tokio to participate in the solemnities. Among them are princes representing reigning houses and special embassies commissioned by republican presidents. The list included Philander C. Knox, secretary of state of the United States, who was accompanied by Ransford E. Miller, chief of the far eastern section of the state department at Washington, Rear Admiral Alfred Reynolds, and Brig. Gen. John J. Pershing. Members of the regular foreign diplomatic body were present in their uniforms.

Everybody at Funeral.

From an early hour in the morning the palace in its great private park in the heart of the capital, was the goal to which virtually everybody in Tokio made his way on foot. The late emperor only occasionally during his life left the moated enclosure where his body had lain in state since August 13. Since that date, on each tenth day, solemn memorial services and sacrifices to the spirit of the departed ruler were performed.

The casket containing the body lay in state in the main hall. At 8 o'clock in the morning the official mourners began to arrive. After a short wait,

(Continued on Page Three.)

ROOSEVELT TALKS ON CONSERVATION

WILL REMEDY MISTAKES IF HE IS ELECTED

Proposes Investigation of Laws Dealing With Conservation

BOISE, Ida., Sept. 12.—Accompanied by William E. Borah, United States senator from Idaho, Colonel Roosevelt came to Boise tonight after a day's campaigning through Oregon and Idaho. Colonel Roosevelt and Senator Borah held a long conference on the train, and it was said that in a few days the senator would make a public statement of the position he will take in the political lineup of the campaign.

Colonel Roosevelt promised to the northwest, in his speech here that if he were elected president he would investigate complaints which he had received that the policy of conservation of the forests was working to the injury of the small settler and playing into the hands of large lumber companies. He opened fire on a staff of campaign speakers, including John M. Harlan of Chicago and former Congressman J. Adam Bede of Minnesota, who today began a tour of the west in behalf of President Taft, with the object of following the colonel's path and replying to him.

Senator Borah's visit to Colonel Roosevelt was the occasion of a great deal of speculation among Idaho politicians, as the senator has taken no part in the national campaign, and has not declared himself publicly in favor of any candidate.

Speaks About Forest Conservation.

Colonel Roosevelt was led to speak of the forest conservation policy here tonight, he said, by the fact that since he had been in the northwest he had talked with a number of men who said small settlers on timber claims in some cases had not been treated fairly.

"I have heard these complaints," he continued, "in Oregon, Washington and Idaho. I intend, if I have the honor to be elected president, to see that the conservation policy is administered in the interest of the actual settler—the man who moves on the land to live there, and who will leave it in an improved condition for his children. In other words, the policy should be one of administration for the benefit of the small man and not the great com[illegible]

"If I become president, I shall make it my personal affair to investigate the working of all the laws concerned with conservation, of the water power, of the forest laws and of the grazing laws, so as to make sure they are actually administered, not only honestly, but without any improper red tape in the interest of the small man. If any injustices are being done either through corruption or through a system of red tape in administration, that is all wrong."

Takes Shot at Harlan and Bede.

Colonel Roosevelt first spoke of Mr. Harlan and Mr. Bede in his speech at La Grande, Ore., this morning, where they arrived while he was still speaking. He referred to them as discredited politicians, "who," he said, "have been imported from states in which they had been defeated."

Except for a stop of two hours at La Grande, Colonel Roosevelt was on the train all day, traveling across Oregon into Idaho. La Grande was not on his program originally, but the Progressive leaders of eastern Oregon sent word that people from all parts of their end of the state were going to the Union county fair with the expectation of hearing him and that if he would stop they would provide a special train to take him on to Boise. The colonel once more put aside his resolution to

(Continued on Page Four.)

WILSON KEEPS CLEAR OF N. Y. POLITICIANS

Leaves Dinner When He Finds Himself With Tammany Hall Regulars

ALBANY, N. Y., Sept. 12.—Determined not to interfere with the political tangles of any state, Governor Woodrow Wilson admittedly steered a cautious course today at the New York state fair at Syracuse, where Governor Dix, Charles F. Murphy and many Tammany hall men gathered.

Governor Wilson met Charles F. Murphy, leader of Tammany hall, but held no conference with him. The presidential candidate likewise saw and talked with Governor Dix, who is seeking renomination, but the New Jersey executive discussed no politics with him.

Unaware of the program outlined for the day, Governor Wilson showed plainly his discomfiture at some of the day's events. The presidential candidate said he had no intention, when invited to the state fair, that the Democratic state committee and the Association of Democratic County chairmen were to meet in Syracuse the same day. He said that had he known it, he probably would not have accepted the invitation, because he did not wish to meddle in the internal politics of any state.

In his speech at the fair grounds, where he was given a great reception, Governor Wilson confined himself strictly to the tariff and national issues.

(Continued on Page Four.)

GUBERNATORIAL NOMINATION IS CLOSE

Parks Stands, 14,480, Stewart, 14,135, in 50 Out of 62 Colorado Counties

AMMONS, DEMOCRAT, WINS

Vote Very Slow on Republican Candidates; Nothing on Congressmen-at-Large

DENVER, Sept. 12.—For the first time since the polls closed Tuesday night on the first state primaries results in the majority of contests on the Democratic and Republican ballots became definitely known late tonight.

In the Democratic party the Progressive element has been victorious in most of the important federal and state offices, but in the Republican party honors have been more even.

For governor on the Republican ticket, Philip B. Stewart, Progressive, made decided gains since last night over his opponent, C. C. Parks, regular. Stewart adherents claim that if their candidates continue to gain at the same ratio as he has during the day that Parks will be defeated by a narrow margin.

DENVER, Sept. 12.—Complete returns from 50 out of 62 counties in Colorado in the count of Tuesday's primary election assure the nomination by the Democratic party of Governor John F. Shafroth to the long term of the United States senate, Edward T. Taylor, incumbent, as one of the two congressmen-at-large, and E. M. Ammons as governor.

For governor on the Republican ticket, Philip B. Stewart, Progressive Republican, and C. C. Parks, regular, are running close.

The following were for the Demo[illegible] recorded:

Senate, long term—Alva Adams, 18,052; Governor John F. Shafroth, 25,971; T. J. O'Donnell, 12,522.

Congressman-at-large (two to be selected):

Edward T. Taylor, 34,949; W. L. Clayton, 17,762; Edward Keating, 20,272; Katherine Williamson, 10,446.

Congressman, First district—A. W. Rucker, incumbent, 7,250; George J. Kindel, 8,091; M. C. Harrington, 5,563; A. Drumm, 2,452.

Governor—E. M. Ammons, 22,538; T. J. Tynan, 17,350; J. H. Maupin, 11,542.

Secretary of state—J. B. Pearce, 22,406; M. P. Capp, 13,663; T. M. Raney, 3,049; Leo Vincent, 7,255.

Supreme court justice—J. R. Dixon, 21,059; Tully Scott, 24,094; F. N. Dickerson, 4,452.

The vote for the gubernatorial candidate on the Republican ticket stands: P. B. Stewart, 14,135; C. C. Parks, 14,480.

The two leading candidates for other offices on the Democratic ticket, out of complete returns from 50 counties, received the following vote:

Lieutenant governor—B. F. Montgomery, 21,965; R. B. Beshoar, 8,765.

Auditor—Roady Kenehan, 29,212; Charles Leckenby, 9,582.

Treasurer—M. Leddy, 30,896; M. H. Van Fleet, 10,601.

Attorney general—Fred Farrar, 22,838; H. L. Lubers, 15,863.

Superintendent, public instruction—Mary C. C. Bradford, 15,581; Inez Johnson Lewis, 12,530.

Regent University of Colorado (long term)—J. B. Ragan, 3,029; W. H. Bryant, 8,875.

S. L. Hallett is an unopposed candidate to fill the vacancy.

The complete results from 50 counties in the Republican contests give:

United States senator (long term)—C. C. Dawson, 18,769; M. D. Vincent, 12,205.

Short term—C. W. Waterman, 16,386; James Brown, 11,881.

Two congressmen-at-large—A. A. Johnson, 5,938; J. P. Miller, 5,631; J. J. Laton, 9,545; S. H. Kinsley, 15,335.

NEW REPUBLICAN COUNTY CENTRAL COMMITTEE TO ORGANIZE TOMORROW P.M.

The newly elected Republican committeemen and committeewomen of El Paso county, together with the Republican county candidates will meet in the district court room at the court house tomorrow afternoon at 2 o'clock, to elect a chairman, vice chairman and secretary. The candidates, as well as the committeemen and committeewomen, compose the county central committee, according to the new state primary law, and the body as organized next Saturday will form the regular Republican county central committee.

According to the new law, the members must organize within five days of the election. Clerk Shelden hopes to learn the result [illegible] close contests by tomorrow, so [illegible] will know if [illegible] on the committee. [illegible] horse [illegible] 5 miles

PROGRESSIVES ARE URGED TO COMBINE

Antimachine Democrats Suggest This as Means to Defeat Party Organizations

DENVER, Sept. 12.—For all Progressives, no matter what their party, to get together and concentrate their strength on Progressive candidates, irrespective of the candidates' party affiliations, is the plan set on foot tonight at a meeting of Progressive Democrats. A committee was appointed to confer with similar committees of the Progressive Republicans and the Bull Moose party.

The action of the Progressive Democrats was the result of the defeat of a majority of the Progressive Democratic precinct committeemen by the organization candidates at the primaries Tuesday.

It is said that the organization, or so-called machine Democrats, will be in control of the county and state central committees as a result of the primary, and in this the Progressive Democrats see danger to the Progressive cause.

In this plan the Progressive Democrats who met tonight see sure victory for Progressive principles and of breaking the power of the machine organization within both old parties by putting only Progressives of both parties in office.

MRS. SICKLES IN ROLE OF GOOD SAMARITAN

NEW YORK, Sept. 12.—The personal effects of Gen. Daniel E. Sickles, civil war corps commander, and former United States minister to Spain, will not, as the general had feared, go under the hammer of Sheriff Julius Harburger to satisfy a judgment of about $5,000 which a trust company held against the aged soldier.

General Sickles' wife, who was a belle in the court of Spain, when the veteran wooed and won her in Madrid in 1871, and from whom he has been parted for more than 27 years, today satisfied the judgment through the sacrifice of valuable jewels he possessed.

NOMINATED FOR SENATE BUT TOO YOUNG FOR JOB

SALT LAKE CITY, Sept. 12.—After Julian Bamberger had been nominated by acclamation as a candidate for state senator by the Democratic county convention here today, it was discovered he was too young to serve. The nomination then was given to his father, S. Simon Bamberger, who also received the entire vote of the convention.

Two women also were named on the Democratic legislative ticket. They are Mrs. Alice Merrill Horne, who has already served one term in the Utah legislature, and Mrs. Isabelle Kenner.

3-YEAR-OLD BOY A CIGARETTE SMOKER

SALT LAKE CITY, Sept. 12.—The youngest tobacco smoker in the experience of the police department was picked up today when Iver Salow, aged 3, walked down the street beside his father puffing at a cigarette in his little tobacco-stained fingers. Father and son were sent to the juvenile court.

E. A. CALAHAN DEAD

NEW YORK, Sept. 12.—Edward A. Calahan, inventor of a number of devices commonly used in the telegraphic service, died today at his home in Brooklyn. He invented the ticker machine and the messenger call box.

MARTIN WON HONORS AT AVIATION FIELD

Drops 1,000 Feet to Within Nine Yards of Given Landing Spot

CHICAGO, Sept. 12.—For picturesque flights and thrilling descents, Glenn H. Martin, in a biplane, won chief honors in the aviation meet today. The opening event of the meet, which is held this year on the prairies west of the city of Cicero, was a contest for the best landing at a given spot from an altitude of 1,000 feet with the motor stopped.

Starting from an altitude from which he was stopped from ascending higher than 1,000 feet only by a frantic signal from the judges' stand, Martin stopped his motor just at sunset and in a graceful sweep to earth, landed 29 feet from the spot marked by a flag not much bigger than a handkerchief. Other distances made by the contestants were Mac Lillie, second, 56 feet; De Lloyd Thompson, 82 feet, and George Mestach, 106 feet. All flew in biplanes.

In dropping into a "postoffice" from 100 feet while in flight, bags filled with mail, Anthony Jannus, in a Benoit biplane, won first place. The bag he dropped came within 49½ feet of the receptacle. Thompson was second with 51 feet and Martin third with [illegible] feet. Maurice Prevost of France, dropped the bag so far from the mark his distance was not taken.

Speed contests were held over a 12-mile course, but no record was taken

AMERICAN FILIBUSTERS TO TAKE HAND IN REVOLUTION

Soldiers of Fortune, Cowboys and Miners Eager to Cross Boundary Line and Battle With the Mexicans

EL PASO, Tex., Sept. 12.—Filibusters, men who fight for any flag or cause, suddenly have sprung into the glare of the Mexican revolution. There are hundreds of fighting Americans at this and other points along the border who will eagerly enter Mexico if handed a rifle and a coil of cartridge belts. News of today's developments to the west where Americans have invaded Mexican soil caused keen excitement here tonight and a marked movement of wandering soldiers and of secret service men.

At the beginning of the present revolution most of the American soldiers of fortune were ejected from the rebel ranks, due to an ill feeling with the rebel leaders. These men mostly have remained along the border, with their pockets well supplied with money, waiting for any development which would make it possible for them to again enter Mexico as fighting men. The present revolution has had no "American legion" of the Madero rebellion, nor any leaders of other races for which the former war was noted. These are the professional filibusters, and they are eager to enter the fight under any leadership, men who would fight for any cause at all.

To Fight Stranded Americans.

But the intent of the present invasion is far removed from the ordinary wine of warfare or the lure of loot. It bears the appeal for the rescue of brothers, the Americans stranded in Mexico at the various mining and cattle centers below the New Mexico and Arizona borders.

The men who have begun the movement are not the professionals, they are mining and cattlemen, the true frontiersmen. They doubtless will be joined by the filibusters, but the professional trouble makers yet have not entered the place.

It is feared that the cowboys of the Texas, New Mexico and Arizona borders, hundreds of hard-riding, sure-shooting young men, will be lured to cross the border in small bands. The Mexican government has taken no precautions to protect the boundary line with cordons of troops, it having been left to the United States soldiers to prevent ammunition smuggling to the rebels.

How able will the American soldiers be or how willing to stop their fellows who wish to cross the border on their mission of rescue of other Americans is yet unseen.

Miners Ready to Join Movement.

Also another element is to be met. It consists of the American mining men in Bisbee, Ariz., and other points near the border, men as tough as the cattlemen. Both the ranchers and the miners are armed, for, since the beginning of petty raids by rebels along the border, most Americans living away from the towns have armed themselves for the motive of self protection.

The money behind the movement, if any, is not identified, but it has been feared for some time that the large corporations controlling properties on the various branch lines running into Mexico from the American railways have been interested in securing some fighting force to guard their properties left unprotected by Mexican federal troops.

A number of men have been offered employment as mine and railway guards along the Mexican railways subordinate to the American lines, but until today there was none other than a gradual and peaceful influx of hired corporation militia.

OJINAGA CAPTURED BY BAND OF REBELS

MARFA, Tex., Sept. 12.—Ojinaga, Mexico, across the international boundary from Presidio, Tex., was surrendered to a rebel band late last night, and, according to a secret agent of the Mexican government, who came to Marfa from Presidio tonight, Pascual Orozco, Jr., rebel commander-in-chief, has established headquarters within the town, which it is believed will be made the base of operations in northern Chihuahua.

The federal losses are stated to be three killed and seven wounded and the rebel casualties 10 killed and a number wounded. Pancho Sanchez, nephew of General Jose de la Cruz Sanchez, federal commander at Ojinaga, is among the federal dead. The attacking party was composed of 300 rebels.

At the outset of the engagement, which began several days ago, the federal garrison at Ojinaga was of about equal numbers, but, Tuesday, Sanchez and 150 of his men crossed to Presidio leaving 100 men to defend the town. This little band continued the fight until Wednesday midnight, when because of a lack of ammunition they were forced to yield.

It is reported that besides the rebel leader several members of his family participated in the battle, and that 1,200 rebels are in the immediate vicinity. This, however, is declared improbable by persons usually well informed as to affairs south of the border.

A party of United States army officers and sightseers, who witnessed the fighting from Presidio, returned to Marfa tonight.

SOME PUEBLO VOTES SOLD FOR $8 EACH

PUEBLO, Sept. 12.—More than $8 each was paid for votes at the primaries on Tuesday by the people of Pueblo county. This was what the county commissioners learned today while checking up the election expenses. In the precinct at Rye, 10 votes were polled, to secure which the expenses were $85. In the city precincts the expenses ran between $1 and $5.

Scent Murder Plot in Incendiary Fire

Special to The Gazette.

CRIPPLE CREEK, Sept. 12.—A probable attempt to murder the entire family of Andrew Larson of Goldfield, last night, was frustrated by the discovery of an incendiary fire at the rear of his house. The fire was extinguished by the Goldfield fire department and the motive of the incendiary found when it was discovered that several sticks of dynamite with fuses attached, had been placed under the bedroom where Larson, his wife and three children were sleeping. Search is being made by the police for three strange men who had been seen loitering about Larson's house during the day.

OFFICIAL COUNT WILL START THIS MORNING

Delayed by Carelessness Election Officials—Later Returns Make Little Change in Close Contests; Canvass Is Necessary to Decide Result in Several Cases

County Clerk Shelden this morning will begin the official canvass of the election returns, and because of the numerous names on both tickets, the count will take several days, despite the fact that Shelden and his assistants will work day and night to complete the work. About 65 election judges and clerks from more than 30 precincts out of the 62 in the county failed to sign the poll books, and when this was discovered yesterday morning, Shelden refused to proceed with the count, and notified the careless officials to come to his office at once and sign the books. Up to a late hour last night all but half a dozen had done so, and the work can start today.

The law provides that the official returns must be certified and duplicate copies submitted to the secretary of state within 10 days after the election. Clerk Shelden has named Justice J. E. Williams, Republican, of Peyton, and Justice Phillips, Democrat, of Fountain, to act with him as a canvassing board.

Returns on the Republican vote from four precincts, and on the Democratic vote from 13 precincts, became known yesterday. No additional precincts probably will be heard from until the official count is given. The pluralities of the state Progressive Republicans were increased by the belated returns, but little difference was made in the pluralities of most of the county candidates on both tickets. In 47 precincts Vincent has a plurality of 762; Dodge, 572; Stewart, 1,349, and Griffith, [illegible].

The closest race on the local Democratic ticket is between Horn and [illegible]

CITY BRIEFS

BROADMOOR CASINO open. Table d'hote dinner, $1.50. Dancing every night.

PROF. J. E. WALTON'S Academy for Boys and Girls opens Sept. 3. Separate classes for girls. 831 N. Tejon. Call mornings.

MRS. ELDREDGE'S district will meet with Mrs. Nicholson, 110 S. Wahsatch, Thursday afternoon at 3:00. Ladies will bring their own work.

LADIES AID SOCIETY of St. Pauls M. E. church will meet Thursday afternoon at 2:30, at the church. All members invited. Strangers welcome.

BRIEF SESSION—The city council met yesterday morning only long enough to transact unimportant routine business, and adjourned after a session of a few minutes.

LIGHTS ON—On Huerfano street, between Nevada and Tejon, the newly installed ornamental lights were turned on for the first time last Tuesday night.

WILL SPEAK—A. E. Reimer, candidate for president on the Socialist Labor ticket, will deliver an address from the bandstand in South park at 7:30 o'clock this evening.

MARRIAGE LICENSES—Two marriage licenses were issued by the county clerk yesterday, as follows: Herman Cruts, aged 23 years, and Miss Minnie Rausch, 17, both of Colorado City, and George H. Bryant, divorced here in June, 1911, on grounds of desertion and nonsupport, and Mrs. Agnes Carrick, both of Colorado Springs. The latter couple were married later by Justice Dunnington. Consent to the marriage of Miss Rausch was given by her guardian, Anne M. Werkhausen.

BEYLE BROS., Undertakers and Embalmers, 16 E. Kiowa. Phone 299.

The Pikes Peak Floral Co., Retail Florists, 104 N. Tejon St. Main 599.

We have at Colorado Springs, for quick sale, cash or payments, one of our famous Pianola pianos; slightly used; very latest model. Also, one upright piano, slightly used. These instruments must be sold at once and no reasonable offer will be refused. Write for particulars.
THE DENVER MUSIC COMPANY,
Denver, Colorado.

T. F. Burk has opened a barber shop on Tejon St. at 102 Exchange place, in rear of Stewart's kodak store. Your patronage is solicited.

Among the prominent visitors in Colorado Springs are Dr. George H. Dowsey and party, who arrived last night in the special car Plymouth on the Denver & Rio Grande. This car is said to be one of the finest ever made. The party will leave Monday for the east.

A Wisconsin archbishop has spoken his mind about the habit of wearing "crazy" hats to church. Some women who have been interviewed agree with the archbishop. They say that one should not wear "crazy" hats to church. But theirs of the women have admitted that their own hats are "crazy."

Societies and Clubs

Mrs. Arnold's district will meet with Mrs. R. C. Harden at 3 o'clock tomorrow afternoon. A large attendance is expected.

The Woman's Missionary society of the M. E. church, South, will meet at 2:30 o'clock this afternoon in the mission room.

The regular meeting of the Ladies Aid society of the First Christian church will be held tomorrow afternoon at 2:30 o'clock, at the home of Mrs. F. A. Sperry.

Pikes Peak chapter of the American Woman's league will meet this afternoon at 3 o'clock, at Robbins hall. As important business will come up, all members are urged to be present.

Mrs. Eldredge's district will meet with Mrs. Nicholson, 110 South Wahsatch avenue, at 3 o'clock this afternoon. Ladies may take their own work.

The Willing Workers of the Swedish Lutheran church will meet with Mrs. A. P. Anderson, 1722 Colorado avenue, tomorrow evening at 8 o'clock.

Mrs. Slocum's district of the First Presbyterian church will meet with Mrs. Curd, 715 North Wahsatch avenue, this afternoon at 3 o'clock.

The Ladies of the Modern Maccabees will meet in I. O. O. F. hall this afternoon at 2:30 o'clock, to practice floor work. All members are urged to be present.

Mrs. Slocum's district of the First Presbyterian church will meet with Mrs. Curd, 715 North Wahsatch avenue, this afternoon at 3 o'clock.

A regular meeting of the Civic league will be held at 3:30 o'clock tomorrow afternoon, in the council chambers at the city hall.

Personal Mention

John Hall Keene is registered at the Antlers.

W. W. Winne of Denver is attending a meeting of state business men here.

T. L. McFarland and party, composed of Jeanette L. Kane, C. J. Swan, J. C. Lysle, Mrs. E. D. Lysle and F. W. Broad, arrived yesterday and are at the Antlers. They will remain a week.

William Gross of Milwaukee is registered at the Acacia, and will remain two weeks.

Mrs. L. P. Witter has returned to her home in Grand Rapids, Wis. She had been the guest of Mrs. Grant C. Hemenway, 17 West Del Norte street.

Mrs. Harriet W. Nickerson, business manager of the Palmer Lake Life, was in the city yesterday on business connected with the paper.

Mrs. S. Burns Parker and son, Julian, of Brewton, Ala., and Mrs. Annie Stevens Parker of Mobile, Ala., are in Colorado Springs for an extended visit and are staying at 801 North Corona street.

Eliminate Dust!

Don't scatter it from one place to another, but get rid of it by using a Howard Dustless Duster. It takes up the dust and holds it. Wash it when dirty, and it is as good as new, for the chemical which gets the dirt doesn't come out in the wash.

This chemical polishes every article it touches, brightening it and bringing out the original colors.

There is nothing more necessary in this dusty country. Three sizes, "Office," 15c; "Standard," 25c, and "Auto," 45c.

What the Press Agents Say

"MERELY MARY ANN"

This play is an education. It shows the most varied aspects of life from the inside—its preparation has been most careful—a really honest endeavor to live up to the times and people. It is well worth seeing.

We care nothing about eastern productions—with our facilities we can and will give you a version which will be a credit in every way to the author.

The play is in the first instance "a pretty thing;" it is artistic, dramatic and has its comedy side.

Few people know what they are missing and so lose the opportunity of seeing Mr. Cross this week. His act is perfect—largely due to his ability as a musician. As an actor, his work during the past Burns season answers for itself. This week his performance is equal to anything heretofore offered on The Burns stage.

"Merely Mary Ann" is not merely a play. It is a good, wholesome lesson that leaves us all the better for having seen it. Israel Zangwill, so aptly styled the playwright of poverty, has written a quaint, interesting little play, full of pathos, and many flashes of comedy. Mr. Zangwill has written "Merely Mary Ann" with a purpose. It is full of the delicate touches and repressed power that is characteristic of this great Hebrew character delineationist.

Last night it was well put on at the Burns theater. Miss Wayne sustained her triumph of last week. As Mary Ann she is lovable and deliciously funny. The remainder of the company is adequate, but one quite forgets them in the interest that centers around the picturesque and pathetic personality of Mary Ann.

Mr. Cross as Lancelot, the musician, gives a delightful delineation of a character very difficult to portray. His performance is artistic and finished and shows that this conscientious actor devotes much study to his art. His piano playing is a real delight and his musical ability makes him ideal for the part.

The staging was excellent and reproduced with conscientiousness and intelligent regard for detail. The confirmed pessimist, the chronic grouch, as well as those who enjoy a quaint and charming comedy romance, will find "Merely Mary Ann" a wonderful cure for the blues and a pleasant evening's entertainment.

And note our prices. Phone Main 200 for reservations. One more matinee this week—Saturday.

HIGH CLASS VAUDEVILLE AT OPERA HOUSE NEXT WEEK

Opening Monday evening next, September 16, at the Grand Opera house, Sullivan & Considine's vaudeville will be offered for the first time in 25 weeks in this city.

Three performances will be given daily. Matinee 2:45, evenings 7:30 and 9:10.

Six headline acts will be offered on the bill.

The Levines, a comedy novelty duo, will be seen on next week's program. This act has been a great success all over the entire Sullivan & Considine circuit.

Jack Campbell, parody singer and monologist, will be seen next week.

Vaudeville will be seen at the Grand for three weeks only.

Popular prices will prevail, matinee 10 and 25 cents; evenings 10, 20 and 30 cents. The first performance each evening being reserved, general admission at matinees.

Vaudeville—first time in months in this city—in a newly decorated theater. Six headline acts, all go to make the three weeks' run at the Grand a great success.

When a theater plays Sullivan & Considine acts, the sign in front always reads, "Where Everybody Goes."

Just watch next week—the week after and the week after.

SCHOOLS IN GOOD SHAPE

Showing great activity, the second week of this year's city school work gives promise of leading to one of the most successful terms in the history of Colorado Springs schools. The pupils have returned to their books with a new zeal, and the teachers are well prepared for the nine months' work. Superintendent C. M. Cole is optimistic about this term's work. He says the schools were never in better shape, the courses never better arranged, and the pupils never more fit physically to stand the study.

Restore Gray Hair to Natural Color

The old idea of using Sage for darkening the hair is again coming in vogue. Our grandmothers had dark, glossy hair at seventy-five, while our mothers are gray before they are fifty. Our grandmothers kept their hair soft and glossy with a "Sage Tea," which also restored the natural color.

One objection to using such a preparation was the trouble of making it. This objection has been overcome by the Wyeth Chemical Company of New York, who has placed on the market a superior preparation of Sage, combined with Sulphur and other valuable remedies for dandruff, itching scalp, and thin, weak, falling hair.

The beauty of the hair depends more on its rich, even shading than anything else. Don't have dry, harsh faded hair, when a simple, harmless remedy will bring back the color in a few days; and don't be tormented with dandruff, itching scalp and loose, falling hairs. Wyeth's Sage and Sulphur Hair Remedy will quickly correct these troubles, and give color, strength and beauty to your hair.

Get a fifty-cent bottle from your druggist today, and prove this to your own satisfaction. All druggists sell it, under guarantee that the money will be refunded if the remedy is not exactly as represented. Agents, the Robinson Drug Co.

GEN. ROJAS SENDS MESSAGE OF DEFIANCE WARNING U. S.

Situation Tense and Intervention May Be Left to Jud[illegible] of the Officers in Command [illegible]oops

State Historical and Natural History Society

DOUGLAS, Ariz., Sept. 12.—Antonio Rojas, commanding the rebels encamped almost within range of Agua Prieta, and less than three miles from the American border, sent a message of defiance tonight in reply to the warning of the United States military authorities against firing on American territory, according to the messenger sent to him. "If the Americans insist on helping the federals, they must suffer the consequences." This was the reply in substance, which was received by Major Hardeman, of the Fourth cavalry, and turned over to General Schuyler, commander of the department of the west. General Schuyler refused to make any statement regarding the matter.

To the messenger who took the notification from the war department, Rojas said:

"Tell your friends in Douglas to get behind brick walls when they hear the firing begin. We aren't going to look where we shoot."

Guns Trained on Agua Prieta.

The messenger reported that Rojas had three cannon and that an order to move them forward in position to attack Agua Prieta was given while he was present. When he delivered the notification to Rojas, the latter replied, according to the messenger:

"This is the most valuable document I have ever received—it recognizes the belligerency of the rebels."

The situation here is regarded as the most critical since the beginning of the revolution and many expect early intervention. Nearly the entire force of cavalry including the squadron of the Ninth, which arrived last night, is being used in guarding the border tonight. A large force is stationed at the American custom house.

Alarming reports were received tonight from El Tigre, where an attack by the combined forces of Salazar and Alanis is threatened. Alanis and his band of about 600 came up from the south and were reported as being within 20 miles of the camp this afternoon. Consul Dye is making strenuous efforts to have aid sent to the camp in order to protect the 75 Americans, including six women, who have been unable to leave.

Just at dark a number of shots were fired near Agua Prieta and it was believed that the rebels had fired upon the federal outposts. Apparently there was no reply. The coming of the rebels created intense excitement and much surprise, as it was not supposed that Rojas' force which numbers not more than 800 men, would attack the superior force of federals now garrisoning Agua Prieta. The federal force which arrived today brought three mountain howitzers, three Colt's automatic guns and nearly a million rounds of ammunition.

One Federal Reported Killed.

General Schuyler, commander of the department of the west, arrived here tonight to take personal charge of the United States forces on the border. It was reported tonight that a federal soldier was killed when rebels fired on the federal outpost tonight.

Urgent telephone messages were received today from El Tigre mine asking for federal troops to protect the 75 Americans there from an expected attack by Salazar. American Consul Dye made a formal request for federal troops of General Sanjines but the latter gave the consul no definite reply.

Americans Fear an Attack on Nogales

NOGALES, Ariz., Sept. 12.—Intense excitement prevails tonight at Nogales, Sonora, across the line from here owing to reports that the rebels under Emilio Campa would attack the town before morning. Great anxiety is felt on the American side because of threats of retaliation on Americans by the rebels because of the transporting of federal troops over American soil.

The garrison at Nogales comprises but 100 men and the reinforcements from Juarez are not expected until tomorrow morning.

The American consul here has sent a warning to Americans at Magdalena of probable acts of reprisals on the part of the rebels.

WARNED NOT TO SHOOT INTO U. S. TERRITORY

WASHINGTON, Sept. 12.—Major General Wood, chief of staff, today instructed army officers at Nogales and Douglas, Ariz., to notify the Mexicans, both federal and insurgent, that they would not be permitted to endanger American life and property by directing their rifle fire into American territory.

If the warnings were disregarded by the Mexicans, the American commanding officers may act at their own discretion. The arrival of Mexican federal reinforcements at the threatened points, it is expected, will result in the withdrawal of the menacing rebel forces to the southward.

CALEXICO, Cal., Sept. 12.—Nothing is known here of an alleged invasion of Mexico by 125 armed Americans by way of Mexicali. The latter town is just across the boundary from this place.

Women Carried Off by Mexican Bandits

MEXICO CITY, Sept. 12.—The Zapatistas have been extremely active the last week in their marauding operations in the states of Morelos and Mexico, and today word was received that Emiliano Zapata is concentrating his forces at Alaltizapan 20 miles south of Cuernavaca, with the announced intention of marching on Cuernavaca, the capital of Morelos, September 15.

Regular traffic on the Cuernavaca division of the National railways has been suspended indefinitely as the result of Tuesday's attack by Zapatistas on a passenger train 50 miles south of Mexico City. Delayed reports show that nine persons were injured in the attack, one of whom has since died. Two women passengers were carried into the mountains by the bandits. The wife of General Angeles, commander of the federal troops in Morelos, was among the passengers robbed.

A number of employes have refused to man trains on account of the danger of the attack from Zapatistas.

TWENTY-TWO ZAPATISTAS EXECUTED BY FEDERALS

TOLUCA, Mexico, Sept. 12.—Twenty-two Zapatistas, captured yesterday in a battle with federal troops near San Mateo, state of Mexico, were executed today under the terms of the proclamation suspending constitutional guarantees.

John [illegible], a British mining man was rescued from a band of Zapatistas and brought to Toluca by Lieutenant [illegible] who returned today from an expedition into the rebel territory. After having robbed [illegible] of 1,000 pesos and his clothing, the Zapatistas carried him away.

Century Old Rites and Military Display Attend Funeral of Japanese Emperor

TOKIO, Sept. 13 (Friday)—Funeral ceremonies of the late emperor of Japan, posthumously known as the "Emperor of the Era of Enlightenment," began today amid surroundings in which century-old rites and costumes were mingled with modern military display. From the most extreme points of Japan subjects have been assembling in Tokio. At midnight great crowds had gathered along the route of the procession.

Official representatives of every country have come to Tokio to participate in the solemnities. Among them are princes representing reigning houses and special embassies commissioned by republican presidents. The list included Philander C. Knox, secretary of state of the United States, who was accompanied by Ransford E. Miller, chief of the far eastern section of the state department at Washington; Rear Admiral Alfred Reynolds, and Brig. Gen. John J. Pershing. Members of the regular foreign diplomatic body were present in their uniforms.

Everybody at Funeral.

From an early hour in the morning the palace in its great private park in the heart of the capital, was the goal to which virtually everybody in Tokio made his way on foot. The late emperor only occasionally during his life left the moated enclosure where his body had lain in state since August 13. Since that date, on each tenth day, solemn memorial services and sacrifices to the spirit of the departed ruler were performed.

The casket containing the body lay in state in the main hall. At six o'clock in the morning the official mourners began to arrive. After a short wait,

(Continued on Page Three.)

ROOSEVELT TALKS ON CONSERVATION

WILL REMEDY MISTAKES IF HE IS ELECTED

Proposes Investigation of Laws Dealing With Conservation

BOISE, Ida., Sept. 12.—Accompanied by William E. Borah, United States senator from Idaho, Colonel Roosevelt came to Boise tonight after a day's campaigning through Oregon and Idaho. Colonel Roosevelt and Senator Borah held a long conference on the train, and it was said that in a few days the senator would make a public statement of the position he will take in the political lineup of the campaign.

Colonel Roosevelt promised to the northwest, in his speech here, that if he were elected president he would investigate complaints which he had received that the policy of conservation of the forests was working to the injury of the small settler and playing into the hands of large lumber companies. He opened fire on a staff of campaign speakers, including John M. Harlan of Chicago and former Congressman J. Adam Bede of Minnesota, who today began a tour of the west in behalf of President Taft, with the object of following the colonel's path and replying to him.

Senator Borah's visit to Colonel Roosevelt was the occasion of a great deal of speculation among Idaho politicians, as the senator has taken no part in the national campaign, and has not declared himself publicly in favor of any candidate.

Speaks About Forest Conservation.

Colonel Roosevelt was led to speak of the forest conservation policy here tonight, he said, by the fact that since he had been in the northwest he had talked with a number of men who said small settlers on timber claims in some cases had not been treated fairly.

"I have heard these complaints," he continued. "In Oregon, Washington and Idaho. I intend, if I have the honor to be elected president, to see that the conservation policy is administered, in the interest of the actual settler—the man who moves on the land to live there, and who will leave it in an improved condition for his children. In other words, the policy should be one of administration for the benefit of the small man and not the great com- [illegible]

"If I become president, I shall make it my personal affair to investigate the working of all the laws concerned with conservation of the water power, of the forest laws and of the grazing laws, so as to make sure they are actually administered, not only honestly, but without any improper red tape in the interest of the small man. If any injustices are being done either through corruption or through a system of red tape in administration, that is all wrong."

Takes Shot at Harlan and Bede.

Colonel Roosevelt first spoke of Mr. Harlan and Mr. Bede in his speech at La Grande, Ore., this morning, where they arrived while he was still speaking. He referred to them as discredited politicians, "who," he said, "have been imported from states in which they had been defeated."

Except for a stop of two hours at La Grande, Colonel Roosevelt was on the train all day, traveling across Oregon into Idaho. La Grande was not on his program originally, but the Progressive leaders of eastern Oregon sent word that people from all parts of their end of the state were going to the Union county fair with the expectation of hearing him, and that if he would stop they would provide a special train to take him on to Boise. The colonel once more put aside his resolution to

(Continued on Page Four.)

WILSON KEEPS CLEAR OF N. Y. POLITICIANS

Leaves Dinner When He Finds Himself With Tammany Hall Regulars

ALBANY, N. Y., Sept. 12.—Determined not to interfere with the political tangles of any state, Governor Woodrow Wilson admittedly steered a cautious course today at the New York state fair at Syracuse, where Governor Dix, Charles F. Murphy and many Tammany hall men gathered.

Governor Wilson met Charles F. Murphy, leader of Tammany hall, but held no conference with him. The presidential candidate likewise saw and talked with Governor Dix, who is seeking renomination, but the New Jersey executive discussed no politics with him.

Unaware of the program outlined for the day, Governor Wilson showed plainly his discomfiture at some of the day's events. The presidential candidate said he had no intention, when invited to the state fair, that the Democratic state committee and the Association of Democratic County chairmen were to meet in Syracuse the same day. He said that had he known it he probably would not have accepted the invitation, because he did not wish to meddle in the internal politics of any state.

In his speech at the fair grounds, where he was given a great reception, Governor Wilson confined himself strictly to the tariff and national is-

(Continued on Page Four.)

GUBERNATORIAL NOMINATION IS CLOSE

Parks Stands, 14,480; Stewart, 14,135, in 50 Out of 62 Colorado Counties

AMMONS, DEMOCRAT, WINS

Vote Very Slow on Republican Candidates; Nothing on Congressmen-at-Large

DENVER, Sept. 12.—For the first time since the polls closed Tuesday night on the first state primaries, results in the majority of contests on the Democratic and Republican ballots became definitely known late tonight.

In the Democratic party the Progressive element has been victorious in most of the important federal and state offices, but in the Republican party honors have been more even.

For governor on the Republican ticket, Philip B. Stewart, Progressive, made decided gains since last night over his opponent, C. C. Parks, regular. Stewart adherents claim that if their candidates continue to gain at the same ratio as he has during the day that Parks will be defeated by a narrow margin.

DENVER, Sept. 12.—Complete returns from 50 out of 62 counties in Colorado in the count of Tuesday's primary election assure the nomination by the Democratic party of Governor John F. Shafroth to the long term of the United States senate; Edward T. Taylor, incumbent, as one of the two congressmen-at-large, and E. M. Ammons as governor.

For governor on the Republican ticket, Philip B. Stewart, Progressive Republican, and C. C. Parks, regular, are running close.

The following vote for the Demo- [illegible] recorded:

Senate, long term—Alva Adams, 18,082; Governor John F. Shafroth, 25,971; T. J. O'Donnell, 12,522.

Congressman-at-large (two to be selected):

Edward T. Taylor, 35,940; W. L. Clayton, 17,762; Edward Keating, 20,272; Katherine Williamson, 10,446.

Congressman, First district—A. W. Rucker, incumbent, 7,220; George J. Kindel, 8,091; M. C. Harrington, 5,563; A. Dromm, 2,452.

Governor—E. M. Ammons, 22,538; T. J. Tynan, 17,850; J. H. Maupin, 11,549.

Secretary of state—J. B. Pearce, 22,406; M. P. Capp, 13,663; T. M. Raney, 3,049; Leo Vincent, 7,255.

Supreme court justice—J. R. Dixon, 21,659; Tully Scott, 24,094; F. N. Dickerson, 4,452.

The vote for the gubernatorial candidate on the Republican ticket stands: P. B. Stewart, 14,135; C. C. Parks, 14,480.

The two leading candidates for other offices on the Democratic ticket, out of complete returns from 59 counties, received the following vote:

Lieutenant governor—B. F. Montgomery, 21,967; B. B. Beshoar, 8,765.

Auditor—Roady Kenehan, 29,212; Charles Leckenby, 9,582.

Treasurer—M. Leddy, 30,896; M. H. Van Fleet, 10,601.

Attorney general—Fred Farrar, 22,838; H. L. Lubers, 15,263.

Superintendent public instruction—Mary C. C. Bradford, 13,581; Inez Johnson Lewis, 12,530.

Regent University of Colorado (long term)—J. B. Ragan, 9,029; W. H. Bryant, 8,575.

S. L. Hallett is an unopposed candidate to fill the vacancy.

The complete results from 50 counties in the Republican contests give:

United States senator (long term)—C. C. Dawson, 15,769; M. D. Vincent, 12,203.

Short term—C. W. Waterman, 15,386; James Brown, 11,884.

Two congressmen-at-large—A. A. Johnson, 5,939; J. P. Miller, 5,631; J. J. Laton, 9,[illegible]; S. H. Kinsley, 13,335.

NEW REPUBLICAN COUNTY CENTRAL COMMITTEE TO ORGANIZE TOMORROW P.M.

The newly elected Republican committeemen and committeewomen of El Paso county, together with the Republican county candidates, will meet in the district court room at the court house tomorrow afternoon at 2 o'clock, to elect a chairman, vice chairman and secretary. The candidates, as well as the committeemen and committeewomen, compose the county central committee, according to the new state primary law, and the body as organized next Saturday will form the regular Republican county central committee.

According to the new law, the members must organize within five days [illegible] election. Clerk Shelden hopes to determine the [illegible] close contests by tomorrow, so [illegible] successful candidates will know if [illegible] on the committee [illegible] day [illegible] horse [illegible] 5 miles [illegible]

PROGRESSIVES ARE URGED TO COMBINE

Antimachine Democrats Suggest This as Means to Defeat Party Organizations

DENVER, Sept. 12.—For all Progressives, no matter what their party, to get together and concentrate their strength on Progressive candidates, irrespective of the candidates' party affiliations, is the plan set on foot tonight at a meeting of Progressive Democrats. A committee was appointed to confer with similar committees of the Progressive Republicans and the Bull Moose party.

The action of the Progressive Democrats was the result of the defeat of a majority of the Progressive Democratic precinct committeemen by the organization candidates at the primaries Tuesday.

It is said that the organization, or so-called machine Democrats, will be in control of the county and state central committees as a result of the primary, and in this, the Progressive Democrats see danger to the Progressive cause.

In this plan the Progressive Democrats who met tonight see sure victory for Progressive principles and of lessening the power of the machine organization within both old parties by putting only Progressives of both parties in office.

MRS. SICKLES IN ROLE OF GOOD SAMARITAN

NEW YORK, Sept. 12.—The personal effects of Gen. Daniel E. Sickles, Civil war corps commander and former United States minister to Spain, will not, as the general had feared, go under the hammer of Sheriff Julius Harburger to satisfy a judgment of about $5,000 which a trust company held against the aged soldier.

General Sickles' wife, who was a belle in the court of Spain when the veteran wooed and won her in Madrid in 1871, and from whom he has been parted for more than 27 years, today satisfied the judgment through the sacrifice of valuable jewels she possessed.

NOMINATED FOR SENATE BUT TOO YOUNG FOR JOB

SALT LAKE CITY, Sept. 12.—After Julian Bamberger had been nominated by acclamation as a candidate for state senator by the Democratic county convention here today, it was discovered he was too young to serve. The nomination then was given to his father, Simon Bamberger, who also received the entire vote of the convention.

Two women also were named on the Democratic legislative ticket. They are Mrs. Alice Merrill Horne, who has already served one term in the Utah legislature, and Mrs. Isabelle Kenner.

3-YEAR-OLD BOY A CIGARETTE SMOKER

SALT LAKE CITY, Sept. 12.—The youngest tobacco smoker in the experience of the police department was picked up today when Iver Balow, aged 3, walked down the street beside his father puffing at a cigarette in his little tobacco-stained fingers. Father and son were sent to the juvenile court.

E. A. CALAHAN DEAD

NEW YORK, Sept. 12.—Edward A. Calahan, inventor of a number of devices commonly used in the telegraphic service, died today at his home in Brooklyn. He invented the ticker machine and the messenger call box.

MARTIN WON HONORS AT AVIATION FIELD

Drops 1,000 Feet to Within Nine Yards of Given Landing Spot

CHICAGO, Sept. 12.—For picturesque flights and thrilling descents, Glenn H. Martin, in a biplane, won the chief honors in the aviation meet today. The opening event of the meet, which is held this year on the prairies west of the city of Cicero, was a contest for the best landing at a given spot from an altitude of 1,000 feet with the motor stopped.

Starting from an altitude from which he was stopped from ascending higher than 1,000 feet only by a frantic signal from the judges' stand, Martin stopped his motor just at sunset and in a graceful sweep to earth landed 29 feet from the spot marked by a flag not much bigger than a handkerchief. Other distances made by the contestants were Mac Lillie, second, 50 feet; De Lloyd Thompson, 83 feet, and George Mestach, 106 feet. All flew in biplanes.

In dropping into a "postoffice" from 100 feet while in flight, bags filled with mail, Anthony Jannus, in a Benoit biplane, won first place. The bag he dropped came within 19½ feet of the receptacle. Thompson was second with 51 feet and Martin third with 82 feet. Maurice Prevost of France dropped the bag so far from the mark his distance was not taken.

Speed contests were held over a 1¼ mile course, but no record was taken.

AMERICAN FILIBUSTERS TO TAKE HAND IN REVOLUTION

Soldiers of Fortune, Cowboys and Miners Eager to Cross Boundary Line and Battle With the Mexicans

EL PASO, Tex., Sept. 12.—Filibusters, men who fight for any flag or cause, suddenly have sprung into the glare of the Mexican revolution. There are hundreds of fighting Americans at this and other points along the border who will eagerly enter Mexico if handed a rifle and a coil of cartridge belts. News of today's developments to the west where Americans have invaded Mexican soil caused keen excitement here tonight and a marked movement of wandering soldiers and of secret service men.

At the beginning of the present revolution most of the American soldiers of fortune were ejected from the rebel ranks, due to an ill feeling with the rebel leaders. These men mostly have remained along the border, with their pockets well supplied with money, waiting for any development which would make it possible for them to again enter Mexico as fighting men. The present revolution has had no American legion of the Madero rebellion, nor any leaders of other races for which the former war was noted. These are the professional filibusters, and they are eager to enter the fight under any leadership, men who would fight for any cause at all.

To Fight Stranded Americans.

But the intent of the present invasion is far removed from the ordinary wine of warfare or the lure of loot. It bears the appeal for the rescue of brothers, the Americans stranded in Mexico at the various mining and cattle centers below the New Mexico and Arizona borders.

The men who have begun the movement are not the professionals; they are mining and cattlemen, the true frontiersmen. They doubtless will be joined by the filibusters, but the professional trouble makers yet have not entered the place.

It is feared that the cowboys of the Texas, New Mexico and Arizona borders, hundreds of hard-riding, sure-shooting young men, will be lured to cross the border in small bands. The Mexican government has taken no precautions to protect the boundary line with cordons of troops, it having been left to the United States soldiers to prevent ammunition smuggling to the rebels.

How able will be American soldiers be or how willing to stop their fellows who wish to cross the border on their mission of rescue of other Americans is yet unseen.

Miners Ready to Join Movement.

Also another element is to be met. It consists of the American mining men in Bisbee, Ariz., and other points near the border, men as tough as the cattlemen. Both the ranchers and the miners are armed, for, since the beginning of petty raids by rebels along the border, most Americans living away from the towns have armed themselves for the motive of self protection.

The money behind the movement, if any, is not identified, but it has been feared for some time that the large corporations controlling properties on the various branch lines running into Mexico from the American railways have been interested in securing some fighting force to guard their properties left unprotected by Mexican federal troops.

A number of men have been offered employment as mine and railway guards along the Mexican railways subordinate to the American lines, but until today there was none other than a gradual and peaceful influx of hired corporation militia.

OJINAGA CAPTURED BY BAND OF REBELS

MARFA, Tex., Sept. 12.—Ojinaga, Mexico, across the international boundary from Presidio, Tex., was surrendered to a rebel band late last night, and, according to a secret agent of the Mexican government, who came to Marfa from Presidio, tonight, Pascual Orozco, Jr., rebel commander-in-chief, has established headquarters within the town, which it is believed will be made the base of operations in northern Chihuahua.

The federal losses are stated to be three killed and seven wounded, and the rebel casualties 10 killed and a number wounded. Panicho Sanchez, nephew of General Jose de la Cruz Sanchez, federal commander at Ojinaga, is among the federal dead. The attacking party was composed of 300 rebels.

At the outset of the engagement, which began several days ago, the federal garrison at Ojinaga was of about equal numbers, but Tuesday, Sanchez and 150 of his men crossed to Presidio leaving 100 men to defend the town. This little band continued the fight until Wednesday midnight, when because of a lack of ammunition they were forced to yield.

It is reported that besides the rebel leader several members of his family participated in the battle and that 1,200 rebels are in the immediate vicinity. This, however, is declared improbable by persons usually well informed as to affairs south of the border.

A party of United States army officers and sightseers, who witnessed the fighting from Presidio, returned to Marfa tonight.

SOME PUEBLO VOTES SOLD FOR $8 EACH

PUEBLO, Sept. 12.—More than $8 each was paid for votes at the primaries on Tuesday by the people of Pueblo county. This was what the county commissioners learned today while checking up the election expenses. In the precinct at Rye, 10 votes were polled to secure which the expenses were $8[illegible]. In the city precincts the expenses ran between $1 and $7.

Scent Murder Plot in Incendiary Fire

Special to The Gazette.

CRIPPLE CREEK, Sept. 12.—A probable attempt to murder the entire family of Andrew Larson of Goldfield, last night, was frustrated by the discovery of an incendiary fire at the rear of his house. The fire was extinguished by the Goldfield fire department and the [illegible] of the incendiary found when it was discovered that several sticks of dynamite with fuses attached had been placed under the bedroom where Larson, his wife and three children were sleeping. Search is being made by the police for three strange men who had been seen loitering about Larson's house during the day.

OFFICIAL COUNT WILL START THIS MORNING

Delayed by Carelessness Election Officials—Later Returns Make Little Change in Close Contests; Canvass Is Necessary to Decide Result in Several Cases

County Clerk Shelden this morning will begin the official canvass of the election returns, and because of the numerous names on both tickets, the count will take several days, despite the fact that Shelden and his assistants will work day and night to complete the work. About 65 election judges and clerks from more than 30 precincts out of the 62 in the county, failed to sign the poll books, and when this was discovered yesterday morning, Shelden refused to proceed with the count and notified the careless officials to come to his office at once and sign the books. Up to a late hour last night all but half a dozen had done so, and the work can start today.

The law provides that the official returns must be certified and duplicate copies submitted to the secretary of state within 10 days after the election. Clerk Shelden has named Justice J. E. Williams, Republican, of Peyton, and Justice Phillips, Democrat, of Fountain, to act with him as a canvassing board.

Returns on the Republican vote from four precincts, and on the Democratic vote from 13 precincts, became known yesterday. No additional precincts probably will be heard from until the official count is given. The pluralities of the state Progressive Republicans were increased by the belated returns, but little difference was made in the pluralities of most of the county candidates on both tickets. In 47 precincts, Vincent has a plurality of 762; Dodge, [illegible]; Stewart, 1,049, and Griffin, [illegible].

The closest race on the local Democratic ticket is between [illegible] and

Jewelry as an Investment

There is some jewelry that is purely and simply a luxury. There is other jewelry that is both a luxury and a good investment as well. Diamonds are perhaps the most stable form of jewelry investing that can be made. Diamonds have been steadily increasing in value year after year. You are certain to have a diamond that is worth more, the longer you keep it. You have the satisfaction of wearing a beautiful gem all the time in addition.

The Johnson Jewelry Co.

URGES RAILROADS TO BE MORE FRANK WITH PUBLIC

SEATTLE, Wash., Sept. 12.—Freer and franker dealing with the public by the railroads of the country was urged today by the president, William Sproule of the Southern Pacific company, in an address before the American Association of General Passenger and Ticket Agents.

"Because the railways have maintained almost perfect silence," he said, "it has been inferred that something is wrong. Silence has been mistaken for secrecy.

"The railways have the right to ask, in the public interest as well as their own, that the capital invested in them be allowed to earn such liberal returns that further capital will be induced to enter the railway field, to the upbuilding of the state and the nation."

Complaints are being made by masters of steamers plying past the forts near Port Townsend that their vessels are being endangered because the artillerymen turn searchlights on the pilot house, blinding the navigators.

COUNTY VOTE ON STATE TICKET

Complete returns from 47 out of 62 precincts in El Paso county on the Republican vote, and from 48 precincts on the Democratic vote, show the following results for state nominations:

FOR UNITED STATES SENATOR—LONG TERM

Republican.		Democratic.

RECOMMENDS MEMORIAL TO WOMEN OF CIVIL WAR

LOS ANGELES, Sept. 12.—Delegates to the national encampment of the Grand Army of the Republic held an all-day secret session today, receiving reports of officers and among other things virtually exonorating the officials of the National Soldiers Home at Dayton, O., of charges of mismanagement of that institution.

Commander-in-Chief Trimble in his annual report urged the delegates to take action for the erection of a fitting memorial to "the loyal women of our country, to commemorate their great services and devotion, their willing sacrifices and unequaled fortitude during the period of the Civil war."

Tonight the veterans and the members of auxiliary organizations devoted themselves to pleasure.

Outrunning two of his Civil war comrades, Colonel James L. Smith of Highland Park, Mich., covered 10 miles today in one hour and 14 minutes. The race was run at Washington park before a cheering crowd.

There was to have been several teams in the veterans semimarathon but only two men appeared to contest with Colonel Smith, who is more than 70 years old.

EIGHTEEN COUNTRIES WILL TAKE PART IN EXPOSITION

WASHINGTON, Sept. 12.—The state department announced that up to date 18 nations have accepted the invitation to participate in the Pacific-Panama exposition in San Francisco in 1915. These are Bolivia, Canada, Costa Rica, Cuba, Dominican Republic, Ecuador, France, Great Britian (provisionally); Guatemala, Hayti, Honduras, Japan, Mexico, Nicaragua, Panama, Peru, Salvador and Uruguay.

100-POUND GOLD BRICK PROVES TO BE COPPER

SEATTLE, Wash., Sept. 12.—A $10,000 gold brick swindle perpetrated three years ago on W. R. Marion, a wealthy resident of South Bend, Wash., who has since died, was disclosed today when a cheese-shaped "brick" weighing 100 pounds was declared at the United States assay office here to be made of an excellent grade of copper, coated with a thick layer of pure gold.

Mr. Marion is believed to have bought the brick from a half-blooded Mexican who visited him three years ago.

A new occupation for women that of aid in laboratories and scientific institutes has been opened to women in Germany, and in order to fit candidates, a special one-year course has been added to the Municipal School for Women of Jena.

$9,111,614 TO CLEAN STREETS.

Street Cleaning Commissioner "Big Bill" Edwards of New York has submitted to the committee having preliminary work on the budget for 1913 his estimates for the coming year's expenses. He requests an appropriation of $9,111,614.06. This is $1,689,926.39 more than his department was allowed this year.

SPECIALS FOR FRIDAY

$5 Raincoats 2.25
Raincoat, rubberized face, plaid back, guaranteed to turn water and keep you dry. Tan and gray, full 54 inches long, with pockets and storm collar. Full range of sizes. Friday.......... 2.25

COST OF LIVING IN ENGLAND

London Correspondence New York Sun.

An abstract of the labor statistics of the United Kingdom, just issued, shows that 109.3 pence was needed in 1911 to buy the same quantity of necessaries of life that were buyable for 100 pence in 1900 or 88.2 pence in 1896. Thus in 15 years the cost of living has advanced 25 per cent, equivalent to a deduction by some invisible process of 2½ pence from every shilling of wages paid. The increase in the price of foodstuffs is extraordinary, as 112.4 pence were needed in 1911 to buy the same quantity of corn that was bought in 1894 for 80.8 pence. Potatoes, rice, beef and mutton are not seriously higher, but bacon and eggs have soared. Bacon was lowest in 1896, when 82.7 pence would buy what cost 142.3 pence in 1911. The latest official figures are in 1911, but statisticians are that the increase is continuing, and that the worker is worse off today than he was last year.

British people drink more tea, by far, than the people of any other country. Their average consumption is more than six pounds per capita. The per capita consumption in the United States is less than nine-tenths of a pound. French and German people drink still less.

You can't find anywhere you go so fine an array of "Good Clothes" as we have for you in these Adler-Rochester new models in suits and overcoats. Beautiful fabrics, perfectly tailored.

For the use of persons who have to move about floors on their knees there has been invented a low stool, mounted on casters and with depressions for the knees and receptacles for tools.

CENTURY OLD RITES

(Continued From Page One.)

Emperor Yoshihito arrived. He was in the full uniform of commander-in-chief, with black crepe armband and swordknot. He was attended by Count Togo, grand master of ceremonies, and Count Watanabe, minister of the imperial household.

A small procession composed of the princes of the imperial blood, in order of precedence, came next. The empress then entered in a native court dress, made of hemp cloth, her unbound hair falling on her shoulders. Her upper garment was of dark brown, and her skirt of dull orange. The court ladies and maids of honor, as well as the princesses of the blood, were thus attired.

As soon as the imperial procession had entered the hall, and those composing them had taken their seats, the hanging screen in front of the catafalque was removed by the ritualists, and the Shinto band played a soft dirge on instruments resembling flutes and three peculiar drums. After the chief ritualistics had proffered the sacred food, to the accompaniment of Shinto music, the emperor, the empress, the dowager empress and the princes and princesses advanced toward the casket and worshipped the spirit of the departed emperor. A short silence ensued; the processions were re-formed, and the members of the imperial family retired.

The other members of the assemblage, however, remained to worship the dead emperor's spirit, after which the Shinto ritualists advanced to the altar and removed the offerings to the sound of sacred music. The screen in front of the catafalque was lowered by the chief ritualist and the first ceremony of the funeral ended.

THE VOTE ON LOCAL CANDIDATES

The Republican vote on judicial and county candidates from 47 precincts, nd the Democratic vote from 48 of the 62 precincts in El Paso county, are s follows:

JOHNSON'S WIFE WAS TEMPORARILY INSANE

Champion Says She Twice Saved Him When He Attempted to End His Life

CHICAGO, Sept. 12.—Mrs. Etta Duryea Johnson, wife of Jack Johnson, champion heavyweight pugilist, died a suicide this morning, after wrecking her health in caring for her husband, who was a victim of nervous prostration and suicidal mania for a year on account of injuries and exertion during his fight with Jeffries.

This was the testimony of Johnson at the inquest today over the body of Mrs. Johnson, who shot herself last night in her apartment over the champion's saloon.

Johnson said the nature and extent of his sufferings after the championship fight had been a secret between his wife and himself.

"I am still suffering from the effects of that fight to some extent," he said.

Johnson gave his testimony in tears. He said his wife's efforts to keep him from committing suicide were what broke down her own health.

Wife Saved Johnson's Life.

"I believe I incurred brain fever or some similar derangement from the exertions and the heat of the Jeffries fight," he said. "I was not myself for a year, but the secret was closely kept between me and Mrs. Johnson. She saved me twice when I tried to choke myself to death.

"She seized me and struggled with me and prevented the act. She had an awful time taking care of me for more than a year. I am only telling this now in justice to my wife. It never has been told before."

The jury returned a verdict that Mrs. Johnson committed suicide while temporarily insane.

Jack Johnson, in telling the circumstances that led to his wife's death, said:

"During the last two years she often told me she was tired of living. She tried to kill herself on two occasions. Once she attempted to jump out of a window in a London hotel, and previous to that she tried to take her life by leaping from a train out West.

"I did everything I could to make her happy, and spent money on her lavishly, but most of the time she seemed despondent. I employed two maids to watch her after she attempted to end her life the first time, and one of them was constantly with her.

Denies Domestic Trouble.

"The stories that there was domestic trouble between my wife and my mother and sister are untrue, because they both were very fond of her. My wife and myself made our wills several months ago, each agreeing to leave all the property to the one who survived.

"My wife was suffering from nervous prostration when I married her, and had been under the care of physicians ever since.

"After my fight with Jeffries, I had a nervous breakdown, and the doctors wanted to send me to a sanatorium. She would not let me go, and nursed me day and night for months."

Despite Johnson's protestations that there was nothing but the best of feeling between members of his family and his wife, the pugilist's mother was not present at the inquest.

NEW MEXICO MEDICAL SOCIETY IN SESSION

ROSWELL, N. M., Sept. 12.—The New Mexico Medical society opened a three days' convention here today, in collaboration with the New Mexico Dental society, which also meets during the same time. Only routine business was transacted at the first session. A good crowd was in attendance, in spite of the muddy auto roads.

An adjustable back and ends feature a combination bed, settee, and hammock patented by an Ohio man for use in or out of doors.

COLLAPSES AFTER NEWS OF SCOTTI'S ENGAGEMENT.

Geraldine Farrar, the American prima donna, is seriously ill in a sanatorium near Munich, Germany. According to circumstantial reports, Miss Farrar is suffering a nervous breakdown, the result of grief over the announcement of the engagement of Charlotte Ives, the American actress, to Antonio Scotti, the grand opera baritone, whose name has been linked with Miss Farrar's in engagements and matrimonial rumors for half a dozen years.

H. C. KING ARRESTED

H. C. King, whom the police believe to be a "short-change" swindler, was arrested at midnight last night by Captain Stark. The man was reported to the station from Tucker's restaurant, but when the captain reached there he had gone. Stark kept on his trail and took him in charge at Stokes' chile room.

Always pure, always fresh, Bryant's peanut butter.

OFFICIAL COUNT

(Continued From Page One)

Bussey, for sheriff. Born has a lead of 97 in 48 precincts, but a big precinct one way or the other may double this plurality or put Bussey ahead. For three representatives on the Democratic ticket, Kavanaugh, Radley and Meloy are ahead, but Mrs. Boyd and Ward are pushing them hard.

From incomplete returns here and in Teller county, Starrett seems certain of nomination for district judge, with Hawkins and Cassidy also in the lead for the two remaining nominations. McKesson, the fourth candidate, is only four votes behind Starrett, the high man in El Paso county, but is far behind all three in Teller.

On the Republican ticket, Carpenter, for district attorney, is 89 votes ahead of Strachan in 47 precincts, but Strachan claims about 150 from the other counties. An official count will be necessary to determine the race.

For county judge, Kerr is 22 votes ahead of Kinney, and Miss McCall, for county school superintendent, leads Miss Leech by 39 votes, both figures being from 47 precincts. An official count will be necessary here also.

For constable, Payton is certain of one nomination, while Dolan and Small are neck and neck for the second nomination, Small leading by 65 votes in 26 out of the 35 precincts composing the Colorado Springs justice precinct.

All other county candidates on both tickets are practically assured of nomination, as shown by the totals, so far as received, and printed elsewhere in this issue.

Seldomridge, for congressman from the Second district on the Democratic ticket, carried 23 out of the 43 counties in the district, and his plurality will be about 6,000, it is estimated.

FRIDAY, THIRTEENTH, DOES NOT SCARE PROGRESSIVES

OGDEN, Utah., Sept. 12.—"Friday, the Thirteenth," has no terrors for the members of the Progressive party of Utah, who are again gathering here tonight for the state convention tomorrow, when a complete state ticket will be named. Colonel Roosevelt will speak at an open air meeting at 3:35.

HORSE PLAGUE INCREASES.

DODGE CITY, Kan., Sept. 12.—The horse plague is on the increase in Kansas and spreading to districts heretofore not infected. F. C. Dondaville, deputy live stock commissioner of Kansas, said today that in the last three weeks 1,000 horses had died within a radius of 25 miles of Dodge City.

JOHNSON PAYS HIS RESPECTS TO TAFT AT G. O. P. MEETING

ROCHESTER, Minn., Sept. 12.—Governor H. W. Johnson of California made five speeches in Wisconsin today in favor of the Progressive party, but did not mention Senator La Follette by name although he alluded to him several times indirectly. After crossing Wisconsin, Governor Johnson entered Minnesota and left Rochester tonight for South Dakota.

"This year there are two states that should be the very leaders in this Progressive movement," the governor said. "They are Wisconsin and California. The things we have been doing locally in our states should be done nationally."

Touching on the tariff and President Taft's famous Winona speech, Governor Johnson, at Winona, Minn., tonight, said:

"It was here that the open declaration, the bold admission of the nonfulfillment of the tariff pledge of the party assassinated at Chicago was made. For Winona was reserved the doubtful honor of the president's approval of the Payne-Aldrich tariff bill, that violated the platform pledge of four years ago. And with the knowledge that is yours because of that now famous utterance, you may justly appraise the platitudes of the platform of the Chicago June convention."

INTERNATIONAL WEATHER BUREAU

H. H. Windsor, in the Popular Mechanics Magazine.

With a weather bureau more extensive in all its scope and details than any other in the world, it was fitting that our own chief of service, Prof. Willis L. Moore, should be the leading figure in the recent international congress held in London. The plan is to form an international weather bureau, working chiefly through ships at sea. With wireless already in general use this becomes possible, and is so obviously for the equal advantage of every country concerned that it becomes one of the very few things where all benefit without disadvantage to any. The suggested plan includes daily or less frequent reports to either the American or European clearing house, whichever the sending ship is nearest, and the making up of the forecast, which will be sent out and passed from one ship to another. In this way rough water can be avoided by changing course of larger craft, and small steamers and sailing vessels would often escape injury or even destruction. The cooperation of the several countries interested in the undertaking would furnish one more tie of friendly relationship.

RACE SUICIDE IN AUSTRALIA

From the Chicago Inter Ocean.

And now it is Australia that is worried over race suicide. Lord Denman, the governor general, has advised a maternity grant to the mothers of children born in the commonwealth, stating that the birth rate is too low for a young country and arguing that men and women are the greatest assets of a nation. It is proposed to give $25 for each child.

Even prolific Germany notes a falling off in the birth rate as a sign of the times, but it seems somewhat surprising that a new and prosperous country like Australia, which has been calling for settlers and offers apparently great prospects for the future, should join in the complaint. In 1910 there were 116,834 births, 45,631 deaths and 36,551 marriages in the commonwealth, the population of which was, in that year, about 4,350,000. These figures show a good surplus of births over deaths, but a small birth rate.

Considering that the birth rate is diminishing in almost every European country and that New York state, outside the large cities does not keep up its numbers, the Australian situation seems only a feature of modern civilization. Economic conditions alone fail to explain it, and in any case a bonus of $25 for each child seems hardly likely to cause any great change.

WOULD BE SENATOR AGAIN.

James J. Smith, former United States senator from New Jersey, a power in the Democratic party of that state and an old enemy of Gov. Woodrow Wilson, who has filed a petition as candidate for the United States senate.

Reckless Extravagance

Don't think you are practicing economy when you neglect your teeth. It is the worst form of extravagance. Decayed teeth destroy your health and make you old without age. With modern methods the work is made easy. Prices reasonable and the results are guaranteed.

Dr. J. L. McDonald, dentist, Barnes building, 113 E. Pikes Peak avenue. Office hours, from 8 a. m. to 5:30 p. m., evenings by appointment; Sundays, from 9 to 12. Phone Main 918.

IDAHO PROGRESSIVES MAY NOMINATE BORAH

SPOKANE, Wash., Sept. 12.—Leaders of the Progressive movement in Idaho met today in Spokane to confer with Fred Clagstone, who was defeated for the Republican nomination for governor at the recent primaries, and urged him to accept for governor on the Progressive ticket. On his refusal, almost simultaneously, a movement was started by the Progressive leaders to induce United States Senator Borah to accept the nomination.

ARRESTED FOR FORGERY

ROCKY FORD, Sept. 12.—Lester Neeley, for the past five years a clerk in the postoffice, was arrested tonight while attending a performance in the theater, on a warrant charging him with having forged the name of Postmaster [illegible] W. [illegible] to a note for $200. The note was [illegible] T. W. Browning, a real estate and loan agent. After the arrest it was learned that there were other notes amounting to $1,[illegible] to which other names were [illegible] and that some of them were of long standing.

FALL'S SPEECH PROVES BIG SURPRISE

Chairman of Regular Republican Convention Takes Side of Progressives

CONDEMNS MACHINE POLICY

Declares Party Must Turn to People or It Is Sure to Suffer Defeat

ALBUQUERQUE, N. M., Sept. 12.—With New Mexico's two United States senators presiding, one at the opening of the party's state convention as temporary chairman and the other as permanent chairman, the old guard Republicans today were treated to two vigorous speeches of marked contrast.

Senator T. B. Catron, as temporary chairman, sounded the keynote, in a forceful address, in which a plea for a high protective tariff and just treatment of corporations were the chief features, and in which President Taft was warmly praised and his administration commended.

Fall Lauds Progressives.

Tonight Senator A. B. Fall, as permanent chairman, delivered a Progressive speech, in which Theodore Roosevelt was lauded and the old order of things as regards politics condemned. Senator Fall made the declaration that, unless the Republican party turned back to the people, from whence it derived its power, that it was doomed to defeat and oblivion as a national political organization. The speech of Senator Fall caused a sensation among the delegates, and its effect on the deliberations of the convention, which will conclude its work tomorrow by nominating candidates for congress and presidential electors, is problematical.

Following Chairman Fall's speech the convention got down to business by electing Charles A. Spiess of Las Vegas, national committeeman to succeed the late Solomon Luna.

Three presidential electors were named as follows: Levi A. Hughes, Santa Fe; Eufracio Gallegos, Union county, and Matt Fowler, Luna county.

Nathan Jaffa of Roswell, was the convention's choice as the party's nominee for congress.

TELLER BULL MOOSE NAME COUNTY TICKET

Special to The Gazette

CRIPPLE CREEK, Sept. 12.—The Bull Moose organization of Teller county, after several adjourned meetings, nominated a full county ticket tonight.

A platform was adopted indorsing that of the national convention, and also outlining a policy in regard to all candidates by which they are forbidden to spend money for drinks or cigars in order to secure votes or to seek election on any basis except personal merit. The use of automobiles and carriages to carry voters to the polls also is forbidden. The candidates are admonished to use as little money as possible in the campaign. The convention pledged itself to secure candidates who will give a business-like administration.

The ticket is as follows: Sheriff, Arthur N. Finn; county clerk and recorder, Fenton W. Bruington; treasurer, W. J. Hill; assessor, William McKee; county judge, William Mullen; coroner, Thomas A. McIntyre; surveyor, Ralph R. Arnold; superintendent of schools, Lillian N. Ferguson; commissioner, First district, George W. Sauber of Woodland Park; commissioner, Third district, John [illegible] McCain; representatives, Fred M. Stroud, Charles Waldron and H. T. Jepps.

PRESIDENT BUSY AT HIS BEVERLY HOME

BEVERLY, Mass., Sept. 12.—This was the busiest day President Taft has spent in Beverly this summer. He was in conference from the time he returned from the Myopia links through luncheon until long after dark. He talked with Attorney General Wickersham and Secretary of the Treasury MacVeagh, Chandler P. Anderson, the counselor for the state department; the head of the president's economy and efficiency commission, Dr. F. A. Cleveland, and a few committees from neighboring towns, and posed for moving picture men.

Mr. Wickersham told the president of a conference he held earlier in the day with District Attorney French of Boston, about the prosecution of the United Shoe Machinery company. The proceedings so far have been conducted behind closed doors. The attorney general characterized them "star chamber proceedings," and said that such action was "unheard of."

Mr. Anderson has been on leave from the state department, but discussed the Mexican situation with the president.

Secretary MacVeagh had several matters to take up with Taft. One he regarded as most important was the question of loaning to banks in the west money from the United States treasury to be used in moving crops. He probably will announce a decision within a few days.

About one-third of the world's product of pig iron is accounted for in the United Kingdom, United States and Germany.

SETTLES SOUR, UPSET STOMACH IN FIVE MINUTES--PAPE'S DIAPEPSIN

As soon as it reaches the stomach all that distressing gas, Sourness, Heartburn and Indigestion vanishes.

Time it! In five minutes all stomach distress gone. No indigestion, heartburn, sourness or belching of gas, acid or eructations of undigested food, no dizziness, bloating, foul breath or headache.

Pape's Diapepsin is noted for its speed in regulating upset stomachs. It is the surest, quickest stomach doctor in the whole world and besides it is harmless and delightful.

Millions of men and women now eat their favorite foods without fear—they know it is needless to have a bad stomach.

Get a large fifty-cent case of Pape's Diapepsin from any drug store and put your stomach right. Stop being miserable—life is too short—you are not here long, so make your stay agreeable. Eat what you like and digest it; enjoy it, without fear of rebellion in the stomach.

Diapepsin belongs in your home. Should one of the family eat something which doesn't agree with them or in case of an attack of indigestion, dyspepsia, gastritis or stomach derangement, it is there to give the quickest, surest relief known.

Gibson, Charged With Murder, Loses Jaunty Air When Locked Up in Cell

MIDDLETOWN, N. Y., Sept. 12.—Burton W. Gibson, the New York lawyer who was arrested at his office today on a charge of murdering his client, Mrs. Rosa Menschik Szabo, was locked up tonight at police headquarters here to await arraignment before County Judge Royce tomorrow morning. His self-confidence and jauntiness fled with his arrival here.

PROBING DEATH OF COUNTESS ROSA SZABO.

Besides the Szabo tragedy, there has been a chain of curious coincidences linking Gibson's name with cases of sudden death or disappearance of clients, or of persons connected in one way or another with cases in which he was interested.

The first of four such coincidences occurred when Mrs. Alice C. D. Kinnan, daughter of an aged woman whose property Gibson handled, was murdered at her home in the Bronx. The murder mystery was never solved. Gibson was held pending an investigation but was released on habeas corpus writ and subsequently brought suit for false arrest.

A witness at the Kinnan inquest, Michael Shippo, was found drowned in a shallow creek, and George L. Malcolm, a Wall street broker and relative of the Kinnan family, who had fought Gibson for the control of the estate, was drowned in Long Island Sound from a steamboat.

The last, John Rice O'Neill, a British subject who had conferred with Gibson concerning a mortgage transaction after winning a $10,000 damage suit for the loss of a leg, disappeared after a conference with Gibson more than a year ago.

RECEIVER IS APPOINTED FOR BIG MOTOR COMPANY

NEW YORK, Sept. 12.—Receivers were appointed today for the United States Motor company, a $12,500,000 holding corporation organized in 1905 to control 10 automobile and gas engine manufacturing companies. Its directors number some of the best known capitalists in the country.

The receivers, W. E. Strong and Robert Walker, were appointed by Judge Hough in an insolvency suit brought by creditors. Five of the holding firm's constituent companies were involved, namely: The Alden Sampson Manufacturing company of Detroit, the Brush Runabout company of Detroit, the Columbia Motor company of Hartford, Conn., the Dayton Motor Car company of Dayton, O., and the Maxwell-Briscoe company of Tarrytown, N. Y.

Bankers identified with the company say that the proceedings are friendly and brought with the purpose of clearing up the company's affairs.

The securities of the United States Motor company have been declining on the curb market for some time. The aggregate liabilities of the defendant companies, the petition states, amount to approximately $12,500,000.

Albert Rathbone, counsel for the reorganization committee, states that the committee representing all classes of creditors have reached the conclusion that these companies can be successfully reorganized and with proper management and new capital operate profitably.

Mr. Rathbone said the receivership permits continued operation of the various plants.

Safe Remedy Ends Catarrh Miseries

The quickest, best and safest way to cure catarrh or a cold in the head is by using a remedy that will touch the spot and do its work quickly without leaving any bad effects. Ely's Cream Balm, which is applied to the nostrils or rubbed on the throat or chest gets right at the root of the trouble and instantly relieves even the worst case of catarrh or cold. A few minutes after applied you can feel a loosening up in the head, the pain and soreness are gone, the sense of taste, smell and hearing come back, and you feel like a different person.

Ely's Cream Balm cleanses, heals and strengthens the inflamed membranes, takes away that stuffed up feeling and dull pain in the head, relieves the throat soreness and stops the nasty discharge which is the cause of the disgusting hawking, spitting, blowing of the nose, and foul breath. Hay fever victims who are made miserable by fits of sneezing, coughing and wheezing get instant and permanent relief by the use of this simple remedy.

Don't suffer another minute. Ely's Cream Balm will relieve you immediately, and a 50-cent bottle will more than likely work a complete cure. All druggists sell it. Agents, the Robinson Drug Co.

DROPS SAFELY 2,000 FEET FROM BURNING BALLOON

TOLEDO, O., Sept. 12.—Hundreds of terrorized spectators on the county fair grounds today watched the desperate fight against death made by Frank Armstrong, an aeronaut, when he was carried 2,000 feet into the air by a blazing balloon.

Armstrong was preparing to make an ascension when the ballon caught fire and his startled helpers let go. He succeeded in cutting loose a moment before the flames reached the parachute and made a successful drop.

To cure ringing noises in the ears, due to the displacement of tiny bones in the organs, a French scientist has invented an electrical apparatus which uses sound waves to replace the bones.

ROOSEVELT TALKS

(Continued From Page One.)

make no extra speeches, and consented.

From La Grande, Colonel Roosevelt started eastward again to Huntington, where he spoke for a quarter of an hour from his car. Then he came to Boise.

Senator Borah was on the platform with Colonel Roosevelt at tonight's meeting and made the introductory.

"It is well understood by the people of this state," said the senator, "that I urged the nomination of Colonel Roosevelt at Chicago. I believed then, and I believe now, that had he been nominated the Republican party would have swept the country.

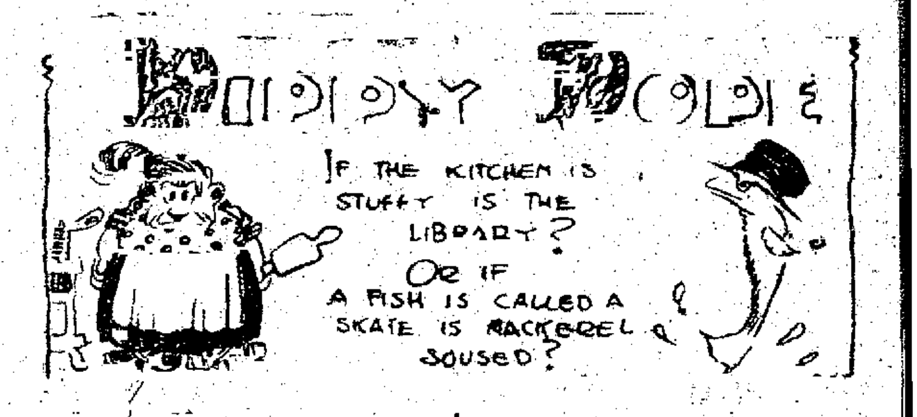
Still Believes in Roosevelt.

"We were unsuccessful at Chicago. It would be uncandid to say because we were unsuccessful that I have ceased to be his admirer. Colonel Roosevelt is one of the most forceful personalities in the world."

The colonel then began a recital of the circumstances which induced him to enter upon a campaign for the presidential nomination and gave his reasons for breaking away from the Republican party. As Colonel Roosevelt made each point, he turned to the senator and said smilingly to the audience: "Ask Senator Borah."

As he finished his recital, Colonel Roosevelt said:

"The man who is acquainted with the facts in regard to the theft of the Republican nomination and condones but does not condemn, is sinning against the light, is putting a premium on dishonesty, and has a seared moral sense."



IF THE KITCHEN IS STUFFY IS THE LIBRARY?
OR IF
A FISH IS CALLED A SKATE IS MACKEREL SOUSED?

WILSON KEEPS CLEAR

(Continued From Page One)

sues. A few minutes afterward he met at the luncheon table Governor Dix, Lieutenant Governor Conway, Norman E. Mack, Charles F. Murphy and other prominent men in state politics. Governor Wilson had expected to dine with the state fair commission, of which Lieutenant Governor Conway is chairman, and was surprised to find himself seated with Tammany hall and other state politicians. After partaking of bread and butter he left the table.

When Governor Wilson returned to his hotel from the fair grounds, members of his own party followed him t a room to which Governor Dix had le him. The two governors entered, bu Charles White, sergeant-at-arms t the state committee, barred everyon else.

Tonight Governor Wilson was aske about the conference. He replied tha Governor Dix "had sought a privat interview."

"Governor Dix stated to me," sai Governor Wilson, "his feeling abou the political situation in the state. I of course, expressed no opinion of an kind about it."

Governor Wilson was asked by th correspondents on the train his ver sion of the entire day's events. Th governor said:

"You evidently want to ask if I al lowed myself to be made use of in an way. Nobody can make use of me b merely meeting me. I merely met th New York leaders, met them in publi and came away absolutely as free a when I went."

The Wholesome Beverage

Every quality that a good drink should have *none that it should not have:* that's what you get in

Coca-Cola

Absolutely pure, wholesome and delicious. Some of the world's greatest scientists by test and analysis have *proved* this; not just asserted, but proved. For example.

The Famous Dr. Schmiedeberg, of Berlin, Germany, says

in a deposition sworn to and presented in the courts, that tea, coffee and Coca-Cola are of similar effect, and in fact that Coca-Cola is not only harmless in every particular but a more wholesome beverage than either of the others.

Will Store 200 Cars of Potatoes Here; 200 More to Be Sent to Denver

Grand Valley farmers soon will start 400 carloads of potatoes toward Colorado Springs for storage and later reconsignment to other points. General Agent N. L. Drew, of the Colorado Midland, arranged yesterday for the storage of 100 carloads, and expects to secure room for 100 carloads more. It is thought the remaining 200 cars will be sent to Denver. The shippers are allowed to store the produce in the state, and later consign it to other points, on a through rate. This enables them to keep the produce until prices advance, with no more expense than the storage and handling at storage point.

MERCHANTS TO COOPERATE IN DEVELOPING RESOURCES

Cooperation in the development of the agricultural resources of El Paso county was the main subject considered at a meeting of the retail merchants, at the rooms of the Chamber of Commerce last night. A report regarding the agreement made by the county commissioners with the United States department of agriculture for the employment of an agricultural expert was made by John Lennox, and the question of securing better means of communication, through the improvement of the roads leading to this section and through the establishment of additional means of transportation, was discussed.

Plans for representation on the part of Colorado Springs at the various county and other fairs to be held within the next two weeks were considered, and special committees will be appointed shortly to take up this question in an active way.

COLLEGE FRESHIES AND SOPHS TO SCRAP TODAY

At daybreak today, the freshmen and the sophomores will gather on the Colorado college campus and contend for the class flag. The scrap promises to be a lively affair this year, as the freshman class is unusually large. Another factor that favors the new men is the rule which prohibits the sophomores from rounding up the freshmen and holding them captives in barns and canons until the fight is over, as was the custom in years past. This morning the full male membership of both classes will face each other, the freshmen greatly outnumbering the second-year men. The scrap is governed by a set of rules framed by the upper classmen. The sophomore colors will be nailed to the Cutler flag pole, and the freshmen will try to bring them down.

EXPRESSION APPRECIATION OF COOPERATION IN PICNIC

Following is an expression of thanks from the Hillside Improvement society to those who contributed to the success of the Labor day picnic at Prospect lake:

To all who contributed to make the Labor day picnic a success the Hillside Improvement society hereby acknowledges the favors and desires to express its appreciation. The occasion was a very enjoyable one, and it is the hope of the society that it may often be repeated, and that the lake and surrounding park may become a pleasant and popular family resort for our citizens.

WHEN THE SKIN BREAKS OUT USE POSLAM

If suffering from any skin affection, it is important for you to know that on your druggist's shelf, in the form of a box of Poslam, lies the concentrated healing power which will ease all physical distress and effect a complete and permanent cure.

With this ready means of relief so easily available, there is really no reason why eczema, acne, tetter, barbers' itch, pimples and like affections should be allowed to go unchecked and their discomforts unnecessarily endured. First application stops the itching, the skin rapidly heals and is restored to normal condition.

POSLAM SOAP is antiseptic and germicidal; the safest and most soothing nursery soap. It improves the health, color and quality of the skin; beautifies complexions, renders the hands soft and velvety.

—Robinson Drug Co., Red Cross Pharmacy, and all druggists, sell Poslam (price, 50 cents) and Poslam Soap (price, 25 cents). For free samples, write to the Emergency Laboratories, 32 West 25th Street, New York City.

COLO. CITY IS NEXT CONVENTION PLACE

After selecting Colorado City as its next meeting place, the Midland Baptist association adjourned yesterday afternoon, bringing to a close one of the best-attended conferences ever held in this district. At the morning session yesterday, the Rev. W. J. Sly discussed Sunday school work and spoke of what ought to be emphasized in that line. Later in the morning, Mrs. A. A. Layton of Denver, who was to deliver an address, being unable to be present, the Rev. Mr. Sly again talked to the association on young peoples societies. The Rev. W. C. King, secretary of the association, told of the problems of the organization.

At the afternoon session home and foreign missions were discussed. Miss Smith, for many years a missionary among the Navajo Indians, told of the work there. Mrs. Carman read an interesting paper on home and foreign missions. The session was enlivened with musical numbers by Miss Mabelle St. John and Miss Eleanor Thomas.

SOCIALIST LABOR NOMINEE FOR PRESIDENT ARRESTED

While addressing a crowd last night at the corner of Tejon and Huerfano streets, Arthur E. Reimer, candidate for president on the Socialist Labor ticket, was stopped by the police and sent to headquarters. He was released on his own recognizance to see Chief of Police Burno this morning. The police say Reimer asked for permission to speak on the streets last night, but was refused. Quite a large crowd had gathered to hear him, but was rewarded by only a few words from the candidate before he was taken in custody.

NOTICE

The Board of County Commissioners of El Paso county, Colorado, will sit as a board of equilization for the adjustment and equilization among the several taxpayers on Tuesday, September 17, 1912, and will continue in session for five days.

By order of the board:
ELROY C. SHELDEN,
County Clerk.
By HENRY McALLISTER,
Deputy.

Societies and Clubs

The regular meeting of the Civic league will be held at 3:30 o'clock this afternoon in the council chambers in the city hall.

Colorado Springs circle No. 652, Women of Woodcraft, will hold a regular meeting this evening at 8 o'clock in Majestic hall.

Mero L. Tanner tent, Daughters of Veterans, will meet in G. A. R. hall this afternoon at 2:30 o'clock.

Miss Curr's district of the First Presbyterian church will meet this afternoon at her home, 126 North Tejon street.

District No. 1 of the First Presbyterian church will meet this afternoon at 3 o'clock at the home of Mrs. Duer, 2204 North Nevada avenue.

An important meeting of the U. S. W. V. will be held this afternoon at 2:30 o'clock, at the home of Mrs. Donahue, 1123 North Corona street.

The Willing Workers of the Swedish Lutheran church will meet this evening at 8 o'clock at the home of Mrs. A. L. Anderson, 1722 Colorado avenue.

The Woman's auxiliary of the First Baptist church will hold its regular monthly business and missionary meeting tomorrow afternoon at 3 o'clock at the church.

Eldorado council No. 114, Royal Arcanum, will hold their regular meeting tonight at 8 o'clock in Odd Fellows hall. A full attendance requested. Visiting members welcome.

Stated communication of El Paso lodge No. 13, A. F. and A. M. this evening at 8 o'clock.

The Christian union of the Second Presbyterian church will meet in the church parlors this afternoon at 2:30 o'clock. Mrs. Patterson will lead the meeting, and all women of the church are invited to attend.

Personal Mention

George W. Goodell, state bank examiner, is registered at the Acacia.

E. F. Smith, of the Golden Cycle Mining company, and Mrs. Smith, are registered at the Acacia.

Jack H. Mackey, Jr., Mrs. H. Mackey and Irene Mackey, of Wichita, are among arrivals at the Alta Vista.

Miss Florence Overton, 223 North Custer, has gone to Falcon, where she will teach.

William B. Wilson, editor of the Palmer Lake Life, was here on business yesterday.

Edward Merchant, traveling passenger agent for the Canadian Pacific railroad, was a business visitor yesterday.

Mr. and Mrs. John T. Hawkins are visiting in Palmer Lake, the guests of Mr. and Mrs. Frank Sherwin, at their home, Pinehurst.

J. C. Carter and family of Boston arrived at the Alta Vista yesterday. After spending a few days here they will leave for California.

Mrs. Clara Gordon and two children, who have been visiting Mrs. J. L. Overton, 223 North Custer avenue, left Saturday for Salem, Ore.

Gilbert W. Lee, interested extensively in automobile manufacturing in Detroit, and his son, George H. Lee, of Colorado Springs, are registered at the Antlers.

Miss Ara Perryman, assistant to School Superintendent Cole, left last evening for Denver to visit her parents before they leave for the east.

Miss Alice R. Shinn, in charge of the art department of the city schools, is rapidly improving from an illness, and it is thought will be able to resume her work by October 1.

Word has been received that Sidford F. Hamp and family, 1528 Wood avenue, who have been spending the summer in England, sailed from Liverpool last Saturday. They are expected here about September 23.

A CHILD'S WASTE CLOGGED BOWELS

Makes them cross, peevish, restless and feverish. See if tongue is coated.

Your child isn't naturally cross, irritable and peevish, Mother! Examine the tongue, if coated, it means the little one's stomach is disordered, liver inactive and its thirty feet of bowels clogged with foul, decaying waste.

Every mother realizes after giving delicious "Syrup of Figs" that this is the ideal laxative and physic for children. Nothing else regulates the little one's tender stomach, liver and bowels so effectually, besides they dearly love its delightful fig taste.

For constipated bowels, sluggish liver, biliousness, or sour, disordered stomach, feverishness, diarrhoea, sore throat, bad breath or to break a cold, give one-half to a teaspoonful of "Syrup of Figs," and in a few hours all the clogged up waste, sour bile, undigested food and constipated matter will gently move on and out of the system without griping or nausea, and you will surely have a well, happy and smiling child again shortly.

With Syrup of Figs you are not drugging your children, being composed entirely of luscious figs, senna and aromatics it cannot be harmful.

Full directions for children of all ages and for grown-ups plainly printed on the package.

Ask your druggist for the full name, "Syrup of Figs and Elixir of Senna," prepared by the California Fig Syrup Co. This is the delicious tasting, genuine old reliable. Refuse anything else offered.

Waltz, "Alma, Where Do You Live?"
Two-step, "The Greyhound."
Waltz, "Valse D'Amour."
Two-step, "The Gaby Glide."
Waltz, "Little Boy Blue."
Two-step, "Russian Pony."
Waltz, "The Hour That Gave Me You."

BRITISH SCIENTIST SUGGESTS DEEP COAL VEINS BE BURNED

From Popular Mechanics.

Sir William Ramsay, one of England's famous scientists, says there is absolutely nothing, so far as he can see, to prevent a bore-hole from being put down until the coal stratum is reached and the setting of the coal on fire by electricity, thus converting the coal in the bowels of the earth directly into gas. Air would be sent down to enable the coal to burn, the amount of air being restricted when sufficient heat had been engendered; steam would be sent down to provide a mixture of hydrogen and carbonic oxide, or water-gas. great gas engines would be mounted at the mouth of the pit or bore hole, and the gas would be used to develop electric power.

The Westminster Men's Society for Women's Rights of London publishes a weekly paper called the Eye-Opener. Among other things, it deals with the present inefficient state of the law for the protection of women.

Dern's Coffee Mill

Freshly Roasted Coffee

How Do You Make Your Coffee?

Cover the ground coffee with pure, cold water and bring to a boil. Into this, pour as many cups of clear, boiling hot water as you want cups of coffee. Let stand a few moments only before using it. This is the simplest method to bring out the coffee oil—the real flavor.

Our coffee has been specially roasted to produce this concentrated coffee flavor—to bring out the oil. That's why the flavor is always better. That's why it makes ten more cups to the pound.

Get Dern's coffee.

AMMONS MAY SPEAK HERE WITH W. J. BRYAN

William Jennings Bryan, who announced a campaign through the west several days ago, will be in Colorado Springs next Monday evening to talk Democracy. He will come down from Denver Monday afternoon, and that evening will talk in Temple theater. Mr. Bryan will go to Pueblo early Tuesday morning for an address in that city.

A committee composed of H. H. Seldomridge, [illegible] Starrett, C. M. Hawkins, H. C. Cassidy, W. D. Lombard and M. A. Skinner will go to Denver Monday morning to meet the Commoner and escort him to Colorado Springs.

The committee has invited E. M. Ammons, whose nomination for governor on the Democratic ticket seems certain, to give an address here the same night. An answer is expected today.

News of Local Courts

Word has reached Colorado Springs of the death of Dr. J. O. Leddie, August 28, at Prince Rupert, B. C. Dr. Leddie was a Scotchman, and was a practicing physician here for a number of years. He held the positions of secretary of the El Paso County Medical society and chief of the Caledonian society, and was a Mason. About six years ago he went to the then new town of Prince Rupert, being the first physician there. He was very successful in the Canadian town, and made many friends. He leaves a widow, who was with him at the time of death.

After being married only six months, Mrs. Cora Roberts was yesterday granted a divorce from Nelson Roberts on the ground of mental cruelty. The couple were married in Pueblo, March 11. Mrs. Roberts was allowed to resume her maiden name of Allison.

No successor to the late District Attorney Ferguson has been appointed yet, and the work of the district courts is at a standstill. Yesterday morning Judge Sheafor excused until next Thursday the jurors who had been empaneled for the September term. The civil docket will be set Monday, September 23.

FOR SALE AT AUCTION

A house known as 130 Cheyenne avenue, will be sold on the ground to the highest bidder at public auction on September 14th, 1912, at 10 A. M. for cash. The purchaser to remove the same on or before September 30th, 1912. Done by order of the Board of Education of School District No. 11.

(Signed) VAN E. ROUSE,
Secretary.

UTAH COPPER MINERS READY TO WALK OUT

SOLD CHEAP MILK IN "HORLICK MILK" JAR

W. W. Pearce, manager at Park and Washington pleaded guilty before Justice of the Peace Bell to selling a cheaper grade of malted milk from jars in which "Horlick's Malted Milk" had been shown, and when Horlick's Malted Milk was called for. He was fined $25 and costs. The complaint was signed by Food Commissioner Bailey, who is determined to stop the practice of substituting one brand of goods for another without notification of the substitution being made.—Oregon Sunday Journal, Portland, Oregon.

CITY BRIEFS

BROADMOOR CASINO open. Table d'hote dinner, $1.50. Dancing every night.

FREDERIC AYRES JOHNSON has removed his studio to 1611 N. Cascade avenue.

PROF. J. B. WALTON'S Academy for Boys and Girls opens Sept. 3. Separate classes for girls. 831 N. Tejon. Call mornings.

THE Colorado School for Girls will open at Broadmoor, Monday, Sept. 16 at 9:30 a. m. For further information, apply to the headmaster, at the Casino hotel, between 10:30 and 12.

BITTEN BY DOG—The 4-year-old daughter of Mr. and Mrs. Homer F. Davis was attacked Wednesday by a stray dog and bitten on the face. Her condition is not considered serious.

MARRIAGE—Herman W. Gross of Kirkwood, Mo., and Miss Ora Fagan of Fort Worth, Tex., were married yesterday afternoon by the Rev. Samuel Garvin, pastor of the First Presbyterian church. The couple will live in St. Louis.

INSPECT BRIDGE—The county commissioners made a trip to Wigwam yesterday to inspect the bridge being built there. The structure was to have been finished September 1, but because of the floods in that district it was impossible to complete it in the specified time, and the commissioners allowed the contractor until the twentieth of this month to do the work. The bridge will be finished at the later date.

EVANGELIST TO SPEAK—Dr. Ford C. Ottman, one of the leading evangelists of the Presbyterian church, will preach the sermon at the Second Presbyterian church, Fifteenth street and Washington avenue, next Sunday.

TEACHER ELECTED—The board of education met last night in the board rooms for a short session, but did little business. Mary P. Clauser of Denver was elected to the position of assistant sloyd teacher for the Colorado Springs grade schools. There was considerable discussion regarding the improvements being made in the high school buildings.

SAN LUIS SCHOOL

For girls and boys will reopen Wednesday, Sept. 18. For information and circulars telephone Main 414, or principal may be seen mornings at the school between 10 a. m. and 12.

Eliminate Dust!

Don't scatter it from one place to another, but get rid of it by using a Howard Dustless Duster. It takes up the dust and holds it. Wash it when dirty, and it is as good as new, for the chemical which gets the dirt doesn't come out in the wash.

This chemical polishes every article it touches, brightening it and bringing out the original colors.

There is nothing more necessary in this dusty country. Three sizes, "Office," 15c; "Standard," 25c, and "Auto," 45c.

Y. M. C. A. Notes

Since school has started, interest is more keen in the tennis tournament to be held one week from next Saturday, between the High schools of Colorado Springs, Colorado City, Manitou, Canon City, Cutler academy and Pueblo, for possession of the Dr. W. W. Flora cup, which was won last year by the local High school through the clever work of Frank Evans. It is thought Wilhelm Sheffer will represent the Colorado Springs High school this year, and Gardner Jackson will play for Cutler academy. The Colorado City students who have been doing faithful work, are expected to put out a player who will score heavily. Besides the cup for the school, the winner will get an individual cup, and the runnerup also will get a prize. The games will be played on the Y. M. C. A. court.

Indoor baseball again is claiming interest, and there are now three teams available for this season's play, which will start October 1 at the Y. M. C. A. gymnasium. The teams ready are Robbins, Powell-Doner and Holy Name. A fourth team will be selected within the next 10 days. Basketball also is coming in for attention. The gymnasium work of the association is gaining impetus every day.

DR. AGNES DITSON TO DELIVER LECTURES HERE

With regard to sex education, the Civic league is offering to the teachers in the public schools of Colorado Springs a course of six lectures dealing with the different phases of the subject.

The speaker is to be Dr. Agnes Ditson of Denver. The lectures will be delivered at Grace church parish house at 3:45 in the afternoon. The subjects and dates are as follows: The Evolution of Sex, October 2; The Anatomy of Sex, October 9; The Physiology of Sex, October 16; The Pathology of Sex, October 23; The Sociology of Sex, October 30, and Sex Education, November 6.

FALLS FROM CAR

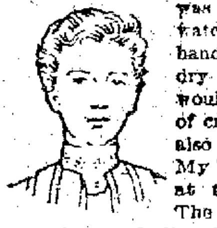
While alighting from a northbound street car at the corner of Huerfano and Tejon streets yesterday afternoon, Mrs. Mary Preece, 735 East Cache la Poudre street, fell to the pavement. She sustained a scalp wound and a contusion of the scalp. She was removed to a physician's house, and later to the Glockner. The wounds are not considered serious.

British people drink more tea, by far, than the people of any other country. Their average consumption is over six pounds per capita. The per capita consumption in the United States is less than nine-tenths of a pound. French and German people drink still less.

Oregon and Washington are states where roses bloom all the year round.

HANDS CRACKING AND BLEEDING

With Eczema, Watery Blisters, Disfigured and Sore. Could Not Put Them in Water. Cuticura Soap and Ointment Cured.



St. Clair, Mo.—"My trouble began about fifteen years ago. It was what some claimed eczema. The form the disease worked under was a breaking out with watery blisters on my hands which would then dry and scale; and then would follow the trouble of cracking and bleeding, also itching and hurting. My hands were disfigured at the time, and sore. The trouble was very annoying, and disturbed my sleep. This last February it was ever so much worse than before. I did not do all my work on account of the condition of my hands. I could not put them in water without making them worse. I tried a lot of home remedies, also salves and liniments that claimed to be a cure for the trouble, but I did not obtain a cure.

"At last I saw the advertisement for Cuticura Soap and Ointment. I sent for a sample. I thought they would cure, so I sent for a fifty-cent box of Cuticura Ointment and some Cuticura Soap. A doctor advised me to keep ahead with the Cuticura Soap and Ointment and they cured me completely. No trace of the trouble remains." (Signed) Mrs. Mary Taylor, Mar. 29, 1912.

Cuticura Soap and Cuticura Ointment are sold throughout the world. Liberal sample of each mailed free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. T, Boston."

Tender-faced men should use Cuticura Soap Shaving Stick, 25c. Sample free.

THE TERRIBLE TURK DEFEATS WHIRLWIND

By IRVIN BRUCE

In one of the most spectacular matches ever pulled off in the Springs, Yussif Husrane, the "Terrible Turk," defeated Mike Donnelly, the "Irish Whirlwind," in two straight falls. The Turk obtained the first fall in 38:5, with a scissors on the head, and the second with a half nelson and crotch hold, after 20 minutes of hard wrestling.

From the time the referee announced time, the men went after each other hammer and tongs. After they had been wrestling for more than 20 minutes, the furious pace began to tell on the Irishman, and the Turk handled him more easily.

Mike is without a doubt the largest man that has ever appeared in the ring here, tipping the scales at 245.

So fast and furious was the pace set by the grapplers that the men went through the ropes continually, first one and then the other. They would be called back to the center of the ring and would go after it all the harder. Time after time the Turk would pick the big Irishman clear of the mat and heave him with great force to the mat, where Mike would bounce like a big rubber ball.

The Turk tried his favorite scissors hold on the Irishman, but was not able to work successfully on account of the great strength of Mike's neck, which enabled him to break numerous holds.

After the bout Mike declared from the ring that after he has become acclimated he will wrestle the Turk for a side bet of $100 that the latter cannot throw him in two hours. When the "Whirlwind" made this statement, Sandow jumped into the ring and was ready with a brand new one hundred-dollar bill to prove that he could defeat the visitor. Mike said that he would put up the money today.

The Turk replied that he will wrestle any man in the world. It is probable that the men will be brought together during the next two weeks.

Play for Antlers Cup Begins Today

This afternoon the play will start for the Antlers trophy, a magnificent cup presented by the Antlers hotel. It is open to all golf clubs in the state, teams of five men each. The clubs entered this year are the Denver Country club, Colorado Golf club of Denver, and the Colorado Springs Golf club.

This afternoon the Denver Country club will play the Colorado Springs Golf club. Tomorrow morning the Denver Country club will play the Colorado Springs Golf club.

The course is in fine condition, and some close matches are looked for.

The Denver Country club won last year.

CANON CITY RESULTS

CANON CITY, Sept. 12.—The program of the Fremont County Fair and Driving association was a good one, and attended by a large crowd, although the presence of a circus and street fair detracted somewhat from the attendance.

The racing program, which was carried out in full, was full of excitement, and each event hotly contested. Results:

The 2:20 trot, purse $300—Buddie G. (Drew), first; Swink (Eaton), second; Emerald (Frecker), third. Time, 2:20¼.

The 2:16 pace, purse $300—Esperre (Camp), first; Easter corn (Dr. Keck), second; Fox S (Lester), third. Time, 2:15 1-5.

One-mile running race, purse $100—Charlie Fox (Cranor), first; Diamond (Gillman), second; Carlyle Bess (Bassett), third. Time, 1:48.

The two and one-half-mile relay race, five changes, purse $100—Gillman string (Hayden), first; Bassett string (Caulk), second; Curtis and Darrow string (Darrow), third.

PURSES OF $60,000 OFFERED CHAMPION

SAN FRANCISCO, Sept. 12.—Twelve pounds sterling in purses, approximately $60,000, is waiting in Australia for Jack Johnson, the negro champion heavyweight, if he will go after it.

This word was brought today on the arrival of W. C. J. Kelly, agent for Hugh McIntosh, the Australian fight promoter. Kelly is on his way to meet Johnson in Chicago and until he learned of the death of Mrs. Johnson, was confident of taking Johnson back with him when he returns.

The gross sum is split into three purses. For a fight between Johnson and Sam Langford, McIntosh offers 6,000 pounds. For fights with Sam McVey and Joe Jeannette, he will give 3,000 pounds.

Athletes Should Be at Their Best at 45, Says 'Pop'

KANSAS CITY, Sept. 12.—There's nothing to the general belief that the efficiency of professional athletes is necessarily short lived, declares "Pop" A. C. Anson, "the grand old man of baseball," former captain of the Chicago National league team. Vigorous training is conducive to long life and rugged health, he contends, rather than to the quick decay of muscular tissue and vitality. Athletes should be at their best at 45, he says.

"Pop" himself is a robust testimonial to the truth of this theory. After 27 years of professional baseball, during which time he never was out of training, and at the age of 60 now, he is a rugged, hearty, agile athlete still, ready at any time to play a hard game of ball, roll a half dozen games of ten pins, do 18 holes at golf or tramp all day behind the dogs in the hunting field. His eye is clear, his step elastic and his carriage as erect as the day he first donned a uniform in a ball club.

He rises at 6 o'clock every morning, and when the weather is fair and links accessible, he seldom misses a round at golf before lunch time.

Forty-five, a Man's Best Age.

"Stars in all lines of sport life rise so suddenly and descend so quickly that the public has come to anticipate the decline of an athlete within a year or two or three after he gets in the championship class," Captain Anson said. "As a matter of fact a young man, say 25 years old, who excels in any branch of athletics should continue to improve each year for 20 years. A prize fighter should be at his best at 45 and in condition for the battle of his life, rather than a fat, broken old has-been.

"It's too bad strenuous relaxation, and not too strenuous training, that kills off athletes. They abuse themselves by dissipation, or permit themselves to get out of condition between occasions of supreme effort, and must go through an exhaustive grind to get back into shape. By dissipation I don't mean necessarily hard drinking or similar harmful practices. A man can dissipate in his eating as well as in drinking and injure himself just as much. Temperance and moderation in all things is essential to prolonged physical efficiency.

In Baseball 27 Years.

I played professional baseball 27 years and played hard. And in all that time I never ceased training strenuously, in and out of season. In winter, when there was no baseball I kept myself in condition by playing handball or rackets and by skating and hunting. In summer I led my team in a daily grind of hard training that kept them chorusing complaints from early dawn to dewy eve.

"It's been 41 years since I began playing professional ball, but I could go on the diamond today and hold up my end in a hard fought game. Three years ago I did play a number of exhibition games, and proved that I still was able to find my way around the bases. That's because I never have quit training. I keep myself in condition now just as I did when I was a baseball player and as though I might be called on to enter the game any minute. Training, instead of dissipating my energies and lessening my vitality, has conserved them.

"Nowadays when a young wrestler or fighter or ball player or runner stays at the head of the class for two or three years we regard him as a wonder. There's really no reason why he shouldn't remain a champion until he has passed 40 years, unless there should come along a rival capable of something better than the champion ever had, and that seldom happens. Few of the champions today are better than the champs of yesterday, and will remain champs only until they cripple themselves with dissipation and some young fellow, still a clean liver, comes along and lays 'em on the shelf.

Training Is the Oil for the Machine.

"It makes me tired to hear that some grand performer in athletics who has dazzled the world with his superiority for a year or two is 'going back.' I know what it means—that that champ has had his head turned by success and prosperity, drifted into speedy company and is going the 'joy riding' route to oblivion. He is a victim of overtraining, all right—overtraining with the happy water and the bright lights and all that goes with them.

"Training to an athlete is what oil is to a machine, and keeping himself in fighting condition all the time should be harmful no more than keeping a machine in the best working condition would be. This history of the world proves that intellectual workers who travel at their best pace all the time last longer than the spasmodic or half-hearted, and I believe the same is true of athletes. Of course, there's such a thing as overdoing it, and overexertion either in training or contests works a permanent injury. But barring such mishaps, the only thing the temperate and intelligent athlete has to fear is old age."

JOHN J. M'GRAW, MANAGER OF THE NEW YORK GIANTS.

McGraw, to all intents and purposes, has won another pennant in the National league, although Chicago gave him a hard chase during the last few weeks. Following the world series McGraw will lead two teams made up of the best players in the major league on a tour of the world.

BIG FOUR TEAMS STILL IN THE RACE

MANCHESTER, Vt., Sept. 12.—Harvard, Princeton, Pennsylvania and Yale each had two men remaining after the first round of match play for the individual intercollegiate golf championship on the Ekwanok links today, while the Williams team was eliminated.

FERNS-MAGILL DRAW

TULSA, Okla., Sept. 12.—Clarence ("Wildcat") Ferns of Kansas City and Art Magill of Bartlesville, Okla., fought 15 rounds to a draw here tonight.

FIGHT BETWEEN FLYNN AND BURNS CALLED OFF

LOS ANGELES, Sept. 12.—The proposed fight between Jim Flynn of Pueblo and Tommy Burns, was declared off today. Manager McCarey of the Vernon club, received word from Burns that business interests at Calgary, Alberta, would not permit of his return to the prize ring.

HERRESHOFF LEAD FIELD

SOUTHAMPTON, N. Y., Sept. 12.—With a score of 84 Fred Herreshoff of Garden City led a field of 106 starters in the qualifying round of the annual tournament over the National Golf Links of America today. High scores were the rule, despite the fact that some of the best American and British players competed.

Wheatley, Covington and Stanage; Coveleski and Egan.

Two-base hits—Baker, Cobb. Double plays—Collins, Barry and McInnis; Barry and McInnis. First base on balls—Off Coveleskie, 1; Wheatley, 4. Struck out—By Coveleskie, 3; Wheatly, 6.

BOSTON, 3; CHICAGO, 1.

CHICAGO, Sept. 12.—Boston made a clean sweep of the series with Chicago today, winning the final game. Lange and O'Brien faced each other in a pitchers' duel, in which the former weakened in the eighth inning, after one man was out. Yerkes was walked and Speaker flied out. Lewis walked and Gardner also drew a pass, filling the bases. Stahl then doubled, scoring Yerkes, Lewis and Gardner. Chicago's lone run came in the eighth. After one was out, Mattick tripled to center and scored on Collins' single.

Score	R.	H.	E.
Chicago	1	7	1
Boston	3	4	0

Lange and Easterly; O'Brien and Cady.

Two-base hits—Hooper, Stahl. Three-base hit—Mattick. Double play—Yerkes to Stahl. First base on balls—Off Lange, 5; O'Brien, 3. Struck out—By Lange, 3; O'Brien, 4.

ST. LOUIS, 3; NEW YORK, 0.

ST. LOUIS, Sept. 12.—Mark Allison held New York to five scattered hits, three of them going to Lelivelt, while his team mates hit Warhop timely, St. Louis winning.

Score	R.	H.	E.
St. Louis	3	8	2
New York	0	5	3

Allison and Alexander; Warhop, Keating and Sweeney.

Two-base hits—Lelivelt, Wallace. First base on balls—Off Warhop, 4; Keating, 1; Allison, 2. Struck out—By Warhop, 4; Keating, 3; Allison, 1.

CLEVELAND, Sept. 12.—Washington

WASHINGTON, 3; CLEVELAND, 2.

CLEVELAND, Sept. 12.—Washington wound up its series in Cleveland by winning. The pitching was even, but Mitchell's three-base wild throw in the seventh inning allowed Washington to score the winning run. Henry was put out of the game for protesting a third strike.

Score:	R.	H.	E.
Washington	3	6	1
Cleveland	2	7	1

Groome and Henry, Williams; Mitchell, Kahler and O'Neill.

St. Joseph	[illegible]	[illegible]	3

[illegible], Johnson and Griffin.

Two-base hits—[illegible]. Three-base hits—[illegible]. Struck out—By Kinsella, [illegible]; Johnson, [illegible].

SIOUX CITY, 3; TOPEKA, 2.

TOPEKA, Sept. 12.—Sioux City bunched hits and defeated Topeka.

Score	R.	H.	E.
Sioux City	[illegible]	[illegible]	0
Topeka	2	9	1

White and Chapman; Young, Cochran and Smith.

Home run—Chapman. Three-base hits—Meyers, Watson. Two-base hits—Lee, King, Jaishang, 2; R. Smith, T. Smith, 2; Meyers, 2. First base on balls—Young, [illegible]; White, 2.

LINCOLN, 3; OMAHA, 2.

LINCOLN, Sept. 12.—Lincoln won an uphill game from Omaha by bunching hits on Robinson in one inning and taking advantage of the three errors of the visitors, which were costly. Dessau pitched a strong game. Score:

										R.	H.	E.
Lincoln	0	0	0	0	0	0	2	1	x	3	7	1
Omaha	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	2	5	3

Dessau and Stratton; Robinson and Johnson.

Two-base hits—McCormick, Mullen, Thomason. Struck out—By Dessau, 4; Robinson, 5. First base on balls—Off Dessau, 1; Robinson, 2.

JOE PATCHEN II WINS FEATURE AT SYRACUSE

SYRACUSE, N. Y., Sept. 12.—Joe Patchen II proved the speediest of the field in the Syracuse $5,000 feature event of today's Grand Circuit meeting, winning in straight heats. The Canadian stallion's best time was 2:03¼. Knight Onward threatened at times, but proved unequal to the task of overtaking the gallant son of Joe Patchen, who led from wire to wire in all three heats.

It was [illegible] all the way in the 2:09 trot. The [illegible] Texas mare was [illegible] by Murphy's Jack London in the last two heats, but won handily.

The 2:08 pace, purse $1,000 (two heats) [illegible] Thacker, first; Busy King, second; Dorsey Jay, third. Time, 2:06¼.

[illegible] 2:09 trot, purse $3,000—[illegible] won; Jack London, second; Charley Perect, third. Time, 2:07¼.

The Syracuse 2:11 pace, purse $5,000—Joe Patchen II won; Knight Onward, second; [illegible] W., [illegible], third. Time, 2:03¼.

[illegible] purse $1,200 [illegible] Barney [illegible] third. Time, 2:[illegible].

[illegible] purse $1,000 [illegible] Ash.

MORE WORLD'S RECORDS MADE IN DENVER SHOOT

[illegible] records [illegible] Anthony, [illegible] breaks at 19 yards. [illegible] amateur from [illegible] Ind., who is leading the field in the average to shoot, continued his high average in the handicap today by breaking [illegible] from the 22-yard mark.

William Ridley, an amateur from Iowa, established a new world's record for an interstate association tournament in shooting at two targets flung from a trap simultaneously. Ridley broke 36 targets out of 50 pairs. The tournament ends tomorrow.

COAST LEAGUE

Vernon, [illegible]; San Francisco, [illegible].
Portland, 4; Oakland, 3 (12 innings).

AMERICAN ASSOCIATION

Columbus, 7; Indianapolis, [illegible].
No other games scheduled.

BIG JEFF TESREAU

[illegible] pitcher of the New York Nationals, whose recent performance [illegible] the [illegible] club [illegible] game, [illegible] Manager McGraw that Tes can be depended upon to bear the brunt of the work from now until the end of the season.

FRIDAY, SEPTEMBER 13, 1912.

A SOLID BASIS

THERE is no logical reason why Colorado Springs should not enter upon a constructive campaign in the direction of building up the country tributary. The tourist feature is a wonderful resource to this city. It should not be neglected, but with this, let us see to it that the temple of our resources has many entrances.

Cities are built and sustained by the country tributary to them. Sometimes they are overbuilt in other words they become greater than the sustaining force and then disaster follows as certain as the night the day unless an effort is made not to build the city larger but to increase the power of the sustaining force.

The country tributary to Colorado Springs would sustain a city with double the population we have if this country could be properly developed and made productive.

Denver is beginning to appreciate the importance of more nourishment. That city is awake to conditions confronting it and instead of attempting to increase the size of the city the builders there will endeavor to better qualify the country surrounding so that it can provide better support.

It is claimed that a properly balanced community under normal conditions, contemplates a producer on the outside for every consumer on the inside. Where this condition prevails the city needs no urging. It can grow without being urged. Every new producer settled in the country tributary brings a consumer to the city.

Properly handled the semiarid region surrounding the city on the South and East could be transformed into a garden spot. In the state of California truck farming is carried on in sections as arid as this. The people have brought supplementary irrigation to their aid. Pumps, operated by windmills, electricity and gasoline engines are lifting the underflow to furnish moisture where it is required.

And, in this connection, it is not out of place to say that the average man has a very crude idea regarding the volume of water actually required to mature crops in the semiarid regions year after year.

Our annual precipitation here is approximately 12 inches. Where this amount is properly distributed it will mature the average crop. Under such conditions storage water, or the underflow, as it is pumped up, is only required to reinforce the normal precipitation.

When the real period of danger arrives a little moisture will work marvels in sustaining the crop until a rain can revive it again.

Here in this county the "farmstead" of California could be made profitable. This means a five-acre tract on the farm, watered from the underflow. This five acres really means an area sufficient to guarantee the staples for a living and by adapting themselves to conditions in planting the proper grains and forage plants, the farmer with his little bunch of cows, his hogs and his hens becomes a wonderful factor in the development of the country and in the building and sustaining of cities.

THE CHEERFUL IDIOT

JUST to illustrate the frailty of the cheerful idiot. A communication received a day or two ago from one of the live commercial organizations of the state possesses considerable food for thought. Emblazoned in letters of radiant hue across the top of the letter head we find these two statements:

"A booster is a man who never complains."

"If he can't boost he keeps still."

These sentiments prompt the question: "What manner of man is the booster?" Analyzed on the basis of the above statements he would be a mollycoddle, insipid, tractable, tame, obliging and without an opinion he could call his own. A man with a mouth to speak when disagreeable things suggested a rebuke yet he would not use it. He might possess a mind capable of evolving affirmative and negative ideas, but he must never use the negative output.

Perhaps this man might have decided opinions on certain questions, but inasmuch as an expression of these opinions might be construed as contrary to the ideas of boosting, he would withhold expression.

If the definition given is true, and the people of the nation had all been boosters, according to it, this country would have found itself in a peculiar condition.

Slavery was not finally disposed of until people began to "knock."

All the reforms recorded in favor of the people in the annals of history came because some man, or collection of men, possessed the courage to offer a difference of opinion.

The world cannot condone the conduct of the "knocker" in all cases, but in many cases the much despised "knocker" is really a "booster." The public as a rule, cherishes a righteous prejudice against the man who stands in the way of progress provided it is really progress and the forward movement of a something that means a general betterment.

Designing individuals often take advantage of this prejudice and attempt to classify everything in the list of progress. If an individual has in mind, or is attempting to negotiate, a bad deal so far as its affect upon the people is concerned, and he finds those in the community who oppose its consummation, the first trick of the trade is to raise the cry of "knocker." By this means he hopes to distract attention from his plans and fool the people by interposing this prejudice.

The optimist is always a better man than the pessimist. The first is normally and naturally a builder, the last is usually a wrecker. The optimist, however, is not without his convictions or the courage to express them. A man is not a builder in any community who, because of his power, destroys others in order that he may build more imposingly on the ruins.

The real "booster" is the man who accomplishes good in the world. Who builds without destroying and who "knocks" whenever a wrong is being committed even if that wrong is perpetrated under the guise of "boosting."

The "booster" is a credit to any and every community, but it is pretty hard to believe that the expression outlined above represents the true definition of the word booster. If it does the dummy in front of a clothing store, wearing the unchangeable smile, is a "booster."

DUTY OF PARENTS

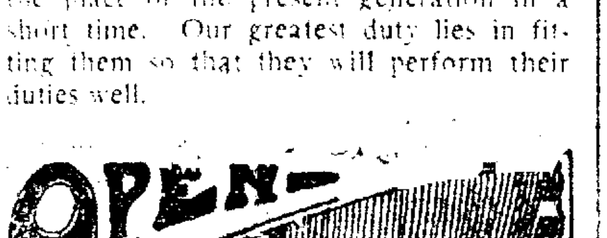
THIS editorial is directed particularly to the parents of children attending the public schools of the city. Colorado Springs has felt a pardonable pride in her schools for years. She has encouraged her teachers and labored to strengthen the school system in every way.

Parents are usually lax in the performance of one very important duty. They should see to it that every possible assistance is rendered the teacher, and there is no greater service to be performed than an evidence of a solicitude for the welfare of the pupil and a sense of gratitude for the efforts exerted by the teacher.

Fathers and mothers should visit the schools, make the acquaintance of the teachers and labor with them in behalf of the child in school. Teachers can achieve better results where they have reason to believe their efforts are appreciated by the parents.

To deal with several hundred little people—each with different disposition, temperament and environment requires diplomacy. Our teachers in this modern age must prove themselves diplomats and they can better do this if you will assist them in determining the strong or weak points of the pupil.

A general working arrangement between parent and teacher will accomplish a great deal for the pupil. The training of the young is one of the most important questions confronting the country. These boys and girls will manage governmental affairs, handle commercial matters and take the place of the present generation in a short time. Our greatest duty lies in fitting them so that they will perform their duties well.



OUR SPRINGS.

To the Editor of The Gazette:

A few years ago Colorado Springs newspapers announced that physicians were soon to make a chemical analysis of the waters of the different springs in the Pikes Peak region for the information of the public. It appears that if a general analysis was ever made, the results were never published. Some of the springs have a card posted nearby announcing the chemical ingredients, and others have not. The questions are often asked: "What is the water of this spring good for?" "What are the ingredients?" and "What specific disease is the water supposed to benefit?" but the reply is generally "Don't know." Why not publish the ingredients, or post a list of them at each spring? Then visitors would know at least what they are drinking and invalids form an intelligent opinion as to whether the water was remedial or not for any particular ailment.

A TOURIST.

Colorado Springs, September 12.

A BUMB SPORT

From a St. Louis Journal.

Miss Harding complained to Rosskoph several days ago Bumb had not carried out his promise to marry her.

✦ ✦

THAT'S ENOUGH—WE'D RECOGNIZE HER IN A MINUTE.

"We, the undersigned, to prove:—That on Thursday past, Maximo Rojas were absent on account of sickness, that his sickness were itches insofar that he were unable to wear trousers. Therefore he were absence."

"Come-Back" People

By RUTH CAMERON.

"Now run in any time and use the phone again. You know I'm perfectly willing to have you."

That sounds like a very cordial invitation, doesn't it? And of course the woman who received it thanked its giver with equal cordiality. But after we had passed out of earshot, she turned to me and said, "But just the same I shan't use that telephone unless I absolutely have to, as I did today."

"Why?" I inquired with some surprise; "she said she was perfectly willing."

"Yes," said the lady, "I know she did, but she's the kind of woman who says that sort of thing before your face and then talks about you behind your back if you take her at her word. How do I know? Because I've heard her talk about other people that way. You want to be careful how you take favors from 'come-back' people."

Do you recognize the woman she was talking about? I don't mean in the flesh, but in the spirit. I am sure you must, because she is certainly a very common type.

Perhaps your neighbor belongs to this class, and neighbor-wise you borrow some coffee from her. She is delighted to lend it, she assures you. "Now don't hurry about returning it," she says, as you depart, "I have plenty, there's really no need of your returning it at all." For some reason you have difficulty in getting just the right quality to return to her, so you take her at her word and do not hurry yourself unduly about canceling the loan. Of course you feel quite safe in doing this because of her kindly reassurances. But it is a spurious safety. For your neighbor is going about the neighborhood saying how slack you are in returning things you have borrowed.

A friend of mine who is a member of this class of "come-back" people who offer favors and then criticise you if you accept them, used to frequently urge me to make use of her automobile. Of course I never intended to accept, but one day stress of circumstances forced me to ask a small favor in this line. She granted it, but in such an ungracious manner that I would have given anything not to have asked. And she further came back by criticising my having done so, to our mutual friends. She did not, needless to say, tell them how eagerly she had urged me to "make use of my car any time, at all, my dear."

To criticise a person for accepting a favor from you is ungracious under any circumstances, but to criticise anyone for accepting favors which you have deliberately lured them into asking is just a bit worse.

Of course there may be some kinds of two-facedness which are more despicable than this variety, but offhand I can't think of any.

Can you?

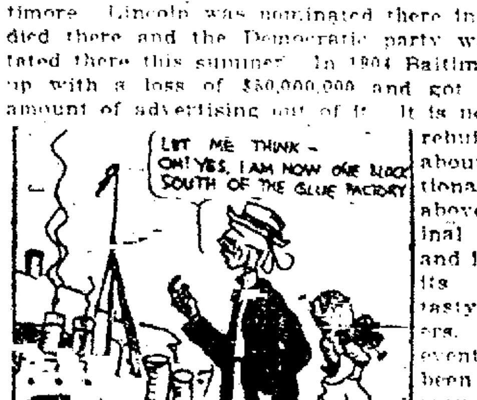
BALTIMORE

BY GEORGE FITCH,
Author of "At Good Old Siwash"

Baltimore, the largest city in the hot bread section of the United States, is located in the heart of Maryland in the vitals of American history and just behind Cleveland, O., in the census returns.

Baltimore is a belle among American cities. She has decorated herself with parks, boulevards, ivy colored walls, shade trees, and monuments instead of sign boards and even her railroad yards have head-florists. Her suburbs are handsome, especially Roland park, which was laid out by a man who had seen three garter snakes in convulsions and who got his inspiration for a street plan from them. Her large buildings were designed by an architect and not by students in plane and solid geometry. Baltimore, however, has adopted the Philadelphia plan of building two-story brick houses a street at a time and now contains several square miles of buildings so utterly alike that the dizzy Baltimorean who gets lost at night is likely to make 1,700 mistakes before he gets into the right house.

Baltimore reeks with history. It entertained Washington in 1789, repelled the British in 1814 and damaged the Sixth Massachusetts in 1861. The first telegraph and railroad lines were built out of Baltimore. Lincoln was nominated there in 1864. Poe died there and the Democratic party was resuscitated there this summer. In 1904 Baltimore burned up with a loss of $50,000,000 and got twice that amount of advertising out of it. It is now entirely rebuilt with about 12 additional layers above the original buildings and is noted for its neat and tasty skyscrapers. Baltimore events have been carefully carved on several dozen monuments which are scattered over the city and the high school classes in Baltimore study history on roller skates.



LET ME THINK - OH! YES, I AM NOW ONE BLOCK SOUTH OF THE GLUE FACTORY

"And tell each ward correctly as he passes through."

Baltimore also reeks with other things in the heated season, owing to its primitive sewer system. It is possible in July for an old resident to travel through the city blind-folded and tell each ward correctly as he passes through it.

Baltimore cans oysters for the whole world and is a great seaport. It is also a deeply religious town and until recently had the only Catholic cardinal in captivity on this continent. It is growing rapidly, but has not yet swallowed its suburbs and has only 28 square miles which means that it could be successfully lost in the corn fields of Chicago. It has 555,000 people of whom 555,000 eat soft-shelled crabs for breakfast.

(Copyrighted by George Mathew Adams.)

NO. 6 JAMES WATT.

Arthur Helps says: "Deduct all that men of the lumber classes have done for England in the way of inventions only, and see where she would have been but for them." One of the very best examples of the patient, never-tiring Englishman was James Watt, the mathematical instrument maker.

Watt was one of the most industrious of men, and the story of his life proves, what all experience confirms, that it is not the man of the greatest natural vigor and capacity who achieves the highest results, but he who employs his powers with the greatest industry and the most carefully disciplined skill—the skill that comes by labor, application and experience.

Many men in his time knew far more than Watt, but none labored so assiduously as he did to turn all that he did know to useful, practical purposes. He was, above all things, most persevering in the pursuit of facts. He cultivated carefully that habit of active attention on which all the higher working qualities of the mind mainly depend.

Even when a boy Watt found science in his toys. The quadrant's lying about his father's carpenter shop led him to the study of optics and astronomy; his ill health induced him to pry into the secrets of physiology, and his solitary walks through the country attracted him to the study of botany and history. While carrying on the business of a mathematical instrument maker, he received an order to build an organ; and, though without any ear for music, he undertook the study of harmonics, and successfully constructed the instrument.

And in like manner, when the little model of Newcomen's steam engine, belonging to the University of Glasgow, was placed in his hand to repair, he forthwith set himself to learn all that was then known about heat, evaporation and condensation—at the same time plodding his way in mechanics and the science of construction—the results of which he at length embodied in his condensing steam engine.

For 10 years Watt went on contriving and inventing—with little hope to cheer him, and with few friends to encourage him. He went on, meanwhile, earning bread for his family by making and selling quadrants, making and mending fiddles, flutes and musical instruments, measuring mason work, surveying roads, superintending the construction of canals or doing anything that turned up and offered a prospect of honest gain.

At length Watt found a fit partner in another eminent leader of industry—Matthew Boulton, of Birmingham, a skillful, energetic and far-seeing man, who vigorously undertook the enterprise of introducing the condensing engine into general use as a working power; and the success of both is now a matter of history.

Watt was engaged some 30 years upon the condensing engine before he brought it to perfection. As an interesting illustration of the inventive genius of Watt, it is told how when he was consulted about the mode of carrying water by pipes under the Clyde, along the unique bed of the river, he turned his attention one day to the shell of a lobster presented at table, and from that model he invented an iron tube which, when laid down, was found effectually to answer the purpose.

TOMORROW: AMBROSE PARE.

CONSTRUCTION METHODS IN HOLLAND

From Consular Report.

Holland in general lies about three feet below the level of the sea, the whole country being protected from the sea by dikes; in consequence of which the climate is very damp and moist, while the soil is quite light, though rich, and, owing to so much moisture, rather soft. As a result of these climatic conditions, it has been found necessary, in constructing buildings, to drive many wooden piles (about 50 feet in length and one foot in diameter) into the ground, upon which a plank foundation is laid. This is done to prevent the walls from settling and cracking, but even in spite of the fact that oftentimes thousands of these large piles are used in one building, few, even of the modern structures, are finished with plastered interior walls such as are so common in the United States.

The walls of the Dutch buildings are universally of brick throughout (solid material from the interior to the exterior without any studding or partitions between the walls); as a substitute for the American studding (2x4s)—built against the brick walls—and upon which the laths are nailed—a wooden frame is here constructed, also against the brick walls, over which a coarse cloth is stretched, and upon this cloth the wall paper is then hung. This makes a very satisfactory, cheap and well-appearing wall, and seems to answer the purpose in every way. The cost of these walls depends, of course, upon the quality of cloth and paper used, but they can be constructed at a much less expense than American plastered walls.

The ceilings are constructed somewhat different than the walls and proportionately at a greater expense. In place of laths, as used in the United States, dry reeds are fastened to the beams, upon which a thick layer of plaster is spread; this is then either painted artistically or decorated with flower or other designs and finished with a coat of "whitewash," presenting in general a very attractive appearance. It is rather uncommon to paper the ceilings in Holland, which are universally finished in a "whitewashed" condition.

So many streets of Berlin are paved with asphalt and wooden blocks that it has been found necessary to fit the horses with "rope" shoes to prevent slipping.

Why not give some thought to Christmas buying now, while our stock of everything is so complete?

HARDY'S
16 N. Tejon

IN THE EARLY DAYS

THIRTY YEARS AGO TODAY

SEPTEMBER, 13, 1882.

The new telegraph line to the summit of the Peak was completed. The old one had been out of business for nearly a year.

The D. & R. G. line was completed to Montrose, and regular trains were being run to that point. Work between there and Grand Junction was being carried on as rapidly as possible.

The first nails ever made in Colorado were turned out by the Bessemer nail works, at Pueblo.

Thermometers in various parts of the city registered 98 degrees in the shade.

TWENTY YEARS AGO TODAY

SEPTEMBER 13, 1892.

It had been discovered that the 16-inch water main which supplied the greater part of the city with water was directly under the piers of the south side of the Huerfano street viaduct, which was then in course of construction. It was thought that the main would have to be protected with masonry arches against possible settlement of the viaduct.

Four citizens, who left their horses unhitched on the streets, were fined $1 and costs each.

The John A. Logan camp of Sons of Veterans held a camp fire and entertained the G. A. R.

THE HASKIN LETTER

MOVING PICTURE SALESMEN

By FREDERIC J. HASKIN.

The moving picture has been recognized for its educational value as well as its amusing qualities for some time, but it is only recently that conservative business men have been able to recognize in it a means of selling articles which heretofore have been almost impossible to have properly exhibited. One cannot carry acres of land to the homes of prospective customers, nor can the steam shovel or large derrick be packed in the salesman's sample grip to be set up at will in the office of a purchaser. While it has been the custom to invite customers to see large machines in operation and to trust largely to descriptive literature for selling land in distant locations, the drawbacks of these methods have been apparent for years. It is not always possible for a man to travel a considerable distance to see a large machine in actual operation, and he hesitates to buy from ordinary photographs and the agents' highly colored descriptions, so the sales which the manufacturers are so anxious to make are not always forthcoming.

A New Field Being Opened.

The moving picture film is the happy medium by which all of these difficulties can be overcome, and millions of dollars' worth of machinery will be sold through its representations in the next year. One of the first corporations to utilize the "movies" in this way was a large hoist and derrick company, which had built a line of steam shovels and excavators which seemed mechanically perfect in their working. The Road Track and Supply Association of America was arranging for a big exhibition in the Coliseum in Chicago, and this manufacturing company eagerly seized what seemed like an ideal opportunity to place its machines before prospective buyers. Space was rented and arrangements completed for setting up one of its big ditch excavators in the building and putting it through the motions of scooping up imaginary earth from an imaginary embankment and loading it upon an imaginary flat car. The object was to give the observer an idea of the number of cubic feet of earth the machine could handle per minute.

Bringing the big machine to Chicago and setting it up in the hall was an expensive and laborious undertaking, but it was achieved finally, only to demonstrate that the effort had been of comparatively little use. The machine was of little use without real dirt to scoop, and really gave no more idea of its working mechanism than a photograph. It towered up like a monstrous toy, but the salesman had to do just as much talking to describe it as though it were still in the factory. Then the moving picture idea came to someone.

Used As a Demonstrator.

A little room was built up in the exhibition place, with a curtained door to keep out the light, and on a screen was shown the operation of the big machine by means of moving pictures, which showed it actually at work upon an Oklahoma road. It scooped up the yellow soil, lifted the loads and placed each neatly upon a car beside it. The big shovel then hung motionless for a few seconds, as if taking breath for another exertion. Then a little spurt of white steam shot up, as if the big monster exhaled a deep breath, and down went its nose into the earth for another load. A section of the track upon which the car stood was picked up and moved a few feet further along to keep up with the excavation. Each movement of the big machine as thrown upon the screen seemed to place the observers in actual contact with its work. Once a snake wriggled out of a load of dirt and the spectators held their breath while the men in the picture stopped work long enough to kill the reptile and then went on as before. This realistic demonstration of what the steam shovel could do was as effective as if the entire audience had been transported to Oklahoma, where the scenes were really enacted.

A company which manufactures farming machinery has found the moving picture an invaluable salesgetter. This company has several lines of education as to the value of its machinery, each of which is worked out by the picture film. One of these shows the process of manufacturing the machine, how it is put together, and its advantages over others of similar type. Another shows the machinery in actual operation in broad fields, harvesting rich grain or preparing land for some new crop, as the case may be. Another company manufactures brick-setting machinery, sand dryers, sand lime brick and cement machinery of special kinds which are beyond the capacity of the ordinary brick manufactory. This firm has for several years been using moving pictures to demonstrate its products to its scattered customers. Films are prepared which can be carried into the private office of a manufacturer by the salesman, and, if necessary, they can be thrown off against the wall of the office, though a screen produces better results.

Must Reach Different Classes.

There are two distinct classes to be reached by the moving picture demonstration. One is composed of individual spectators, who are interested in the purchase of some large machinery which may represent hundreds of thousands of dollars, and must, therefore, be shown up to the best advantage. For this class it usually, is considered better to rent a local theater for a couple of hours in the morning, at the pleasure of the one man or the board of directors of the company interested. After a rehearsal, the local operator and the exhibitor can put the films upon the screen, leaving the representative interested in the sale of the machine free to sit with his prospective customers and make any further explanation necessary. The films have been carefully taken so that every joint in the big machine is brought to eye range, and the pictures may be held or repeated, allowing for a thorough inspection.

If it is to be a general exhibition designed for educating the public regarding the merits of some particular article, the procedure is somewhat different. Before it is given, a local representative has been at work advertising it in some way. As free shows are not appreciated to any extent, the tickets of admission are distributed in some way, and, wherever possible, the names of those who attend are secured. A general exhibition may be made a feature of any large gathering if it shows up an article of popular interest. For instance, a moving picture show of a large canning house, showing all the processes in use before the finished products of canned goods or pickles are placed on sale is a popular feature of a pure food show, especially if a few samples or "tastes" are provided.

Films May "Sell" Anything.

There is nothing, from a traveling crane to a box of stove polish, which may not be sold by moving pictures if properly operated. A certain borax company, during the past two years, has been working in this way to make its product a household necessity. This firm employed five crews of lecturers and exhibitors, who displayed films in over 300 cities to nearly 1,000,000 people.

An automobile company paid out $20,000 for films which showed the care used in every detail of the manufacture of their machine. It aimed to convince the public that the secret of a successful automobile lay in the quality of the work done in preparing the materials for construction. The films take the prospective buyer through every stage of the construction of the motor, from the pig iron to the perfectly forged axles upon the race course. This film gives an idea of the real value of the car, which proved so impressive that the manufacturers consider it one of the best special expenditures for salesmanship they ever made.

Another firm which manufactures a high-grade tooth brush have films made in a similar manner, showing

Dr. McGlauflin will ake his recommendation to the general convention board of the church, hich meets in New York, October 20-23.

What the Press Agents Say

VAUDEVILLE AT THE GRAND OPERA HOUSE NEXT WEEK

Sullivan and Considine's high-class vaudeville will be seen at the Grand Opera house next week, opening Monday, September 16, with matinee daily.

Colorado Springs has been without high-class vaudeville for over 20 weeks.

The management cannot help but meet with great success next week.

Six complete acts will be seen on the bill.

Each and every act being a feature by itself.

Popular prices prevailing at each performance.

No tiresome moving pictures will be seen, as the management will put all expense on real acts.

IN VAUDEVILLE AT THE GRAND OPERA HOUSE, OPENING MONDAY NEXT, SEPTEMBER 16.

Ofttimes, when vaudeville is offered in a theater for three or four weeks, moving pictures are run that have been seen before at the higher-class motion picture houses, and this is just what will not happen next week.

Real S. and C. vaudeville acts will predominate—music, comedy, novelty, and dramatic.

These vaudeville acts will be seen at the Grand for a run of three weeks.

Popular prices: Matinee, 10c and 25c; evenings, 10c, 20c, 30c. Three performances daily. Matinee, 2:45; evenings, 7:30 and 9:40. Seats can be reserved for the first performance each evening. Phone Main 720. Sale opens Monday.

THE BURNS.

What the critic has to say about "Merely Mary Ann."

This play is an education. It shows the most varied aspects of life from the inside—its preparation has been most careful—a really honest endeavor to live up to the times and people. It is well worth seeing.

We care nothing about eastern productions—with our facilities we can and will give you a version which will be a credit in every way to the author.

The play is in the first instance "a pretty thing;" it is artistic, dramatic and has its comedy side.

Few people know what they are missing and so lose the opportunity of seeing Mr. Cross this week. His act is perfect—largely due to his ability as a musician. As an actor, his work during the past Burns season answers for itself. This week his performance is equal to anything heretofore offered on The Burns stage.

"Merely Mary Ann" is not merely a play. It is a good, wholesome lesson that leaves us all the better for having seen it. Israel Zangwill, so aptly styled the playwright of poverty, has written a quaint, interesting little play, full of pathos, and many flashes of comedy. Mr. Zangwill has written "Merely Mary Ann" with a purpose. It is full of the delicate touches and repressed power that is characteristic of this great Hebrew character delineationist.

Last night it was well put on at the Burns theater. Miss Wayne sustained her triumph of last week. As Mary Ann she is lovable and deliciously funny. The remainder of the company is adequate, but one quite forgets them in the interest that centers around the picturesque and pathetic personality of Mary Ann.

Mr. Cross as Lancelot, the musician, gives a delightful delineation of a character very difficult to portray. His performance is artistic and finished and shows that this conscientious actor devotes much study to his art. His piano playing is a real delight and his musical ability makes him ideal for the part.

The staging was excellent and reproduced with conscientiousness and intelligent regard for detail. The confirmed pessimist, the chronic grouch, as well as those who enjoy a quaint and charming comedy romance, will find "Merely Mary Ann" a wonderful cure for the blues and a pleasant evening's entertainment.

And note our prices. Phone Main 200 for reservations. One more matinee this week, Saturday.

A WESTERN GIRL'S DREAM AT MAJESTIC THEATER

May Arnold, a beautiful child of the west, is living happily at home in the far southwest. She is happy with her father, and happy with the thought that she is soon to wed Billy. Clarence Van Ness, a young business man, and a distant relative of Farmer Arnold, from the east, is summoned on urgent business to the southwest. His mother accompanies him. They are warmly greeted at the ranch house. Little May gazes wonder-eyed at Clarence, his easy grace and polished manner attract the girl to such an extent that, after a little quarrel with Billy, she allows her thoughts to wander to the east and a life of luxury.

While pondering over these thoughts, she drops to sleep, and dreams it all came true, but soon found her life was not one of sunshine and roses, and after many trials and tribulations she awakens with a start, only to find she is at home and in the sphere in which Nature had placed her.

CAMP FIRE NOTES

The camp fire of the Blue Bird will give an entertainment and dance tonight at 7:30 o'clock in the association rooms in the DeGraff building. Mrs. C. C. Hamlin will sing, and Mrs. John R. Robinson will give a series of Dunbar readings. Miss Florence Cooley and Miss May Goss, members of the camp fire, also will assist with the program. Refreshments will be served at the close of the evening.

A nominal sum will be charged to all friends of the Blue Birds in attendance, the proceeds to help make up the camp fire budget.

BULL MOOSE CHOICE FOR GOVERNOR.

Oscar C. Strauss, the New York philanthropist-statesman, who was unanimously nominated for governor by the state convention of the Progressive party at Syracuse, only after the new state party had been threatened by a serious split, owing to the stubborness with which comptroller of New York city, William A Prendergast, and State Chairman William H. Hotchkiss, were being boomed for the nomination by their respective followers. Mr. Strauss has served under four presidents and was regarded as one of the ablest and most efficient diplomats in the foreign service. He was first appointed ambassador to Turkey by President Cleveland in 1887 and remained for some time under the Harrison administration. In 1897 President McKinley again sent him to the Turkish capital, where he remained until 1900. He was secretary of commerce and labor during President Roosevelt's second term. Mr. Strauss is a student of diplomacy and is an able writer on diplomatic history and international law, and is a member of The Hague permanent court of arbitration. He is a great admirer of Colonel Roosevelt and his policies.

The total sale of the Aroostook (Me.) potato crop of 1911 is estimated at between 14,000,000 and 15,000,000 bushels, leaving between 2,000,000 and 3,000,000 bushels that were sent to the starch factories, used for seed and food purposes here in the country or lost. It is figured that for crops sold the average price was over $2 a barrel.

In China women carry their children from baskets that hang from a bar that crosses the mother's shoulders. Twins are desirable as preserving the balance of weight, if not for other reasons.

COUNTESS AMELIA NOVELLI SPURNS A FORTUNE FOR LOVE.

"I would marry the man I love if my uncle's fortune was the wealth of Croesus. The man I love is my fortune." Thus did pretty little Countess Amelia Fiaccarini Novelli announce her ultimatum regarding the news that her uncle in Italy had died leaving her a fortune of $250,000, providing she would return to Italy and marry a nobleman. It seems the titled young woman was brought to this country by her parents when quite young and placed in the care of relatives at Brockton, Mass., where she has lived ever since, and where she met her first and only love. It is a boy and girl romance. Andrew J. Gallo fell in love with her and she with him, while they were school mates, and they're going to be married Christmas day.

The Haskin Letter

MOVING PICTURE SALESMEN.

By FREDERICK J. HASKIN.

(Continued From Page Eight.)

each detail, from the cleansing of the bristles to the packing of the finished brush in the antiseptic box in which it is delivered to the customer. At a recent hygienic exhibit, this tooth brush show kept an interested crowd in attendance, and the sales of those brushes in that town justified its cost within the next month.

The moving picture can do much more to sell land in a distant location than any amount of printed matter. A company having a quantity of southern land to sell had some films made showing the actual location, the oranges and other fruits as they grew and in process of harvesting and shipping, and the systems of drainage actually in operation, instead of being described upon paper, so the buyers could feel that they were investing in something which really existed, instead of the swamp or desert lots which too often are the realities of flowery printed descriptions. In the same way, great fields of wavy grain, being harvested in the northwestern lands, show the farmer who desires to go westward what actually is, instead of what may be, developed.

Valuable to Advertisers.

The manufacture of moving picture films for advertising purposes will no doubt eventually develop into a distinct branch of the trade, although at present the commercial films are mostly made by the same firms who produce those for amusement purposes. The cost of the films varies from 50 cents to about $1 a foot, in addition to the expenses of the operator. It is likely that the manufacture of films for exhibiting their output will become a part of the equipment of large manufacturing plants before long, but now the manufacturers find it better to order them from regular photographic establishments doing that work.

Where a large exhibition is not desirable, there is a small projecting machine now upon the market for the special use of salesmen. This comes in a compact little case. When the salesman reaches the office of his prospective buyer, he draws the shade on the window, attaches a socket to the electric light and begins to turn a crank. The machine, or other article he is selling, appears upon the wall, moving quietly and clearly, while the spectator leans back in his chair and listens to the explanations.

Tomorrow—HYGIENE AND SANITATION.

I—International Congress in Washington.

Of the nine millions inhabiting New York state, seven millions live in cities.

Motherhood

The highest point of woman's happiness is reached only through motherhood, in the clasping of her child within her arms. Yet the mother-to-be is often fearful of nature's ordeal and shrinks from the suffering incident to its consummation. But for nature's ills and discomforts nature provides remedies, and in Mother's Friend is to be found a medicine of great value to every expectant mother. It is an emulsion for external application, composed of ingredients which act with beneficial and soothing effect on those portions of the system involved. It is intended to prepare the system for the crisis, and thus relieve, in great part, the suffering through which the mother usually passes. The regular use of Mother's Friend will repay any mother in the comfort it affords before, and the helpful restoration to health and strength it brings about after baby comes. Mother's Friend is for sale at drug stores. Write for our free book for expectant mothers which contains much valuable information, and many suggestions of a helpful nature.

Do You Want to Die Before Your Time?

That is the question the sanitarians and the hygienists hurl in the teeth of mankind and the question is addressed not only to every state and community but to every individual man and woman.

If You Want to Live We Will Show You How!

That is what the sanitarians and the hygienists say to everybody whom they can shock into attention by their dread questionings and they prove their ability to do what they say they will do by cold statistics. Proportionately to population there were 600,000 fewer deaths in the United States in 1910 than in 1890. This was true in the face of the fact that the death rate from chronic diseases had increased in the same twenty years. Thus does sanitary science cheat preventable disease of its harvest of death.

To Make the Whole World Well and Healthy

is the purpose of the sanitarians and hygienists who will hold their Fifteenth International Congress of Hygiene and Demography in Washington beginning on September 23. This Congress which never before has been held in the United States will be attended by scientists from every civilized nation who will tell each other of their victories and their defeats in their battle against disease and premature death.

How These Men Do Their Wonderful Work

will be explained in a series of articles by Frederic J. Haskin reviewing the sanitary progress of the past and telling in plain every day language what the hygienists have done, are doing and what they hope to accomplish.

BEACON HILL PROPERTY IS MAKING BIG PROFITS

Special to The Gazette.

CRIPPLE CREEK, Sept. 12.—Immediately following the reorganization of the El Paso Consolidated Gold Mining company, making it a $500,000 corporation, instead of $2,500,000, which was done at a meeting held in Denver on Tuesday, a dividend of 10 cents a share, payable October 1, was declared. This distribution amounts to $49,000. It is twice the amount of the usual dividends, which heretofore have run $24,500 a quarter.

The company is declared to be in excellent financial condition and, despite the fact that about $130,000 was put up by this company for the drainage tunnel and also for the construction of a part of the Fuller crosscut, the company is in better shape today than it has been in years, and is in a position to pay dividends every quarter for some time to come. The profits derived from the marketing of 130 cars of ore each month are such as to allow the payment of a $49,000 dividend each four months, it is said. The profits to the company are easily $12,000 a month.

The development of the main ore bodies in this famous Beacon hill property continues, and each week sees the opening of new and richer bodies of ore.

With the completion of the ore house at the Nichols shaft, and the installation of a powerful hoist at that shaft, the mine will then be able to make a production of more than 200 cars a month. This is at the rate of seven cars a day. It is possible that a broad gauge track will be run to the new ore house. This would pay for itself in the course of time in doing away with transfer costs.

It is said that shortly the company will commence the cleaning out of the bottom 300 feet of the shaft—that is, the new part from the tunnel up to 1,000. This will be preparatory to the starting up of the development of the bottom levels.

The mine is now producing about 3,000 tons a month, and, since new ore bodies are being opened all of the time, the reserves are not being drawn upon to any extent.

OPEN ORESHUTE IN THE HENRY ADNEY PROPERTY

In the Little Bessie claim of the Henry Adney estate on the west slope of Beacon hill, a new and important ore discovery has been made on the fifth level of the main shaft, in a drift run to the easterly and northerly direction between the Henry Adney and the Maid of Orleans shafts. It is at a point about 600 feet from the main shaft. The ore, as it is mined, will ship at about six ounces to the ton, it is said. Besides that bulk ore, some extra fine stuff, was stripped from the streak.

This makes the third important ore body to be opened by the Henry Adney company. There are two good shoots now being mined, and from these, last month, eight cars were billed out.

LEASE UPPER DEAD PINE PROPERTY TO VICTOR MAN

Joe Phillips and associates have taken a lease on the Upper Dead Pine property, on Battle mountain, from the Dead Pine Mining company, and started operations yesterday morning. The Dead Pine Leasing company has been formed, in which Denver people are said to be interested. The shaft is being cleaned out and preparations are being made to start up the property. An extensive plan of development work has been outlined which will include a thorough search for some of the ore bodies which have recently been discovered in the Ajax shaft. Mr. Phillips is a Victor man, and has had years of experience in mining. It is said that some ore is in sight and can be taken out at once.

The Upper Dead Pine has paid a good deal to leasers in the last five years. Some good ore was mined by a former set of leasers.

T. J. DALZELL GETS OUT A SHIPMENT FROM PORTLAND

T. J. Dalzell and associates, operating a block on the north end of the Portland estate, are preparing a shipment of medium-grade ore, which is taken from the 80-foot level in a drift north of the shaft. The sinking is being continued and will go down until a lift of 100 feet is completed. The ore is of better than milling grade. The streak is widening as it is drifted upon. Dalzell has opened quite a body of ore and will be able to get out two and three cars a month.

PROTECTIVE ASSOCIATION HAS ISSUED 3,290 CARDS

The Miners' Protective association has issued to date just 3,590 cards to the miners and managers and others connected with the workings since the first card was issued about four months ago. It is believed that the great majority of the men working in this district have made application for cards, and in all but 160 instances, the applications have been granted.

NEW YORK MARKET

NEW YORK, Sept. 12.—The stock market today was governed almost entirely by monetary conditions. Call loans opened at 5½ per cent, after considerable delay, later advancing to yesterday's, and the year's high rate of 5½ per cent, while stocks declined.

In the last hour a large part of the early loss was recovered. Indeed, some slight net gains were established, but the undertone of the list continued somewhat halting. The drain of money to the subtreasury and interior points continued, and local banks called loans very generally. To date, home institutions have lost more than $5,000,000, which threatens a large deficit in next Saturday's reserves.

Dealings in stocks were less than yesterday, but there was a further movement in some of the high priced specialties, also a belated demand for Colorado Fuel, which rose smartly in the final dealings on fairly large transactions.

One of the day's developments was the institution of receivership proceedings against the United States Motors company, whose securities have suffered steady declines on the curb.

London's average for our stocks was decidedly higher than that recorded at the opening here.

The bond market was heavy, with weakness in some of the convertible issues. Total sales, par value, amounted to $1,620,000.

United States government bonds were unchanged on call.

CHICAGO MARKET

CHICAGO, Sept. 12.—Heavy receipts southwest, west and northwest today pressed the wheat market down. Closing prices were nervous, ⅜c to ½@⅝c net lower.

Total primary arrivals of what for the day reached nearly double the amount for the corresponding time a year ago. In the southwest a large proportion of the receipts had to be carried over till tomorrow, being far in excess of the demand. The fact that export business was shut off on account of prohibitory ocean freight rates caused holders to become discouraged. Higher opening figures, due to an advance at Liverpool, were promptly taken advantage of, and speculative selling grew general.

Weakness in corn in the end was a material factor in depressing prices. December ranged from 90 to 91¼c, with last sales 90⅜c, a drop of ½@⅝c compared with 24 hours before.

Corn closed at a decline of ¼@⅜c to 2½c.

Oats finished ¼c lower.

Provisions closed less expensive by 5c to 22½c.

The Board of Trustees of the Colorado School for the Deaf and Blind desire bids upon the construction and the plumbing and heating of a two-story fireproof dormitory building, costing approximately $35,000. Arrangements for plans and specifications may be made by application to MacLaren & Thomas, Architects, 221 Hagerman Building.

THE STREETS OF OTHER NATIONS

Julian Street, in Everybody's Magazine.

When one speaks of Broadway, one does not think of the steamship offices in the canon of lower Broadway; the wholesale shirt, cloak and suit, feather and umbrella district above City Hall Park; the old department stores between Union and Madison squares; but of that strange, sordid mile-and-a-half which is given over to amusement, and which—with its unimportant buildings and its general cheap look, only partially redeemed by an occasional fine hotel—must be a bitter disappointment to those who, having heard George M. Cohan's patriotic songs about it, see it for the first time.

Has Its Interesting Features.

Yet the street has interesting features. It is the hottest, tawdriest street on earth at midday in the summer; the coldest, cruelest street at midnight in the winter; and if inhabitants of other planets, gazing at us through their telescopes, see brilliant flashes in the night and think brilliant flashes in the night and think that we are signaling them, it is because commercial gentlemen with goods to sell are signaling, not upward to the heavens, but downward to the earth. For the rest, what does Broadway offer us? Theaters named for other theaters in the European capitals; European actors playing European plays in European clothing; restaurants called after famous Paris eating places; French cooking; French cooks, French waiters and French wines.

French Restaurants an Improvement.

So far as the restaurants are concerned, the French invasion is not to be deplored. No one who is civilized or even semicivilized, will mourn the loss of the "strictly American" restaurant which flourished in such numbers upon Broadway until a decade or so since. Gone are its checkerboard marble floors, its heavy, plush upholstered chairs, its armored plates and sidedishes, its Irish waiters (seasoning the soup with their thumbs), its unimaginative, uninviting bill of fare, set in type once for all, when the establishment first opened, and never changed save when a dish or two was added in peculiar purple handwriting.

Why, I wonder, were all those ancient bills of fare written in purple and in the same illegible hand? It is one of the unsolved problems of our unlovely gastronomic past. Suffice it that the eating house of other days has gone to an unhonored grave in its own greasy gravy.

Near Batum, on the east coast of the Black sea, the Russian government is busily engaged in the cultivation of tea. About 290,000 pounds per year is now grown, and the tea plantations are being extended at the rate of about 135 acres each year, as fast as the rank vegetation on the surrounding land is cleared away. The tea plantations now cover about 1,400 acres.

Five years in prison and a fine of 15,000 marks was the punishment inflicted in Munich on a man convicted of usury. He rented houses and exacted up to 350 per cent a year of his victims.

EDISON'S SON AN EDITOR

"Teddy" Edison, 14-year-old son of Thomas A. Edison, has started a newspaper, a 10-page folder, the Edison Works Weekly, of which he is publisher, editor, reporter, printer and office boy. In the first issue the following is printed under "Impertinent Paragraphs." "When you get real mad at any one, dictate a letter to him on a talking machine; tell him exactly what you think of him—and then smash the record." The paper bristles with suggestions of this sort.

Wants

LOST

LOST—Sunday afternoon at Stratt park, black silk umbrella, with pe and bold handle; small monogram, H. C. Suitable reward will be paid returned to Gazette.

LOST—On Tejon St. or between E panola and Willamette Ave. or Monument park, a pair of gold-rimm eyeglasses, attached to gold brooch p Reward if returned to 115 E. panola St.

CLAIRVOYANTS

MME. DIANA

WORLD RENOWNED FOR HER MARVELOUS PREDICTIONS. MOST RELIABLE, TRUEST. SAVE TIME, MONEY, DISAPPOINTMENT BY CONSULTING MME. DIANA, SCIENTIFIC PALMIST, TRANCE CLAIRVOYANT, PSYCHIC HEALER.

If the mere telling of your name or the names of friends will satisfy you, Madam Diana will do so; what is more important to serious people, is what to do or what to expect regarding present or future affairs. Without asking one question she will tell you what you came for; she will tell you all the incidents, changes and trials of your life.

TELLS YOU WHEN AND WHOM YOU WILL MARRY.

Diana will guarantee to tell you what your ailments are, how to cure them, where you will be most successful, what your health will be all through life, how much wealth you will possess, if any; who it is that causes trouble and how to overcome it. If your mine contains ore, and to what extent; how to control those you love and admire; where your lost ones are; in fact, no matter what you wish to know or wish to do she will accomplish it for you or charge you nothing.

Tells you all the good and bad. Madam tells whom and when you will marry. She tells the color of anyone's eyes and hair that you know. She is THE ONLY PALMIST IN THE WORLD WHO HAS DISCOVERED THE TRUE LINE OF MARRIAGE. She will help you to obtain your greatness; remove evil influences, bad spells. A call may result in your FORTUNE and future happiness.

HER ADVICE UPON ALL BUSINESS MATTERS is invaluable, wise and consistent. SPECULATORS especially should learn of Mme. Diana's wonderful forecasts that have in notable instances brought fortunes to her patrons. Special reduced fees for this week; one-fourth the regular price.

Madam Diana may be consulted from 10 to 8 daily, at 807 Colorado Ave., Colo. City. Permanently located.

CLAIRVOYANT

PROF. DAVID COLERIDGE

50c—READINGS—50c

WHAT I DO IN MY READINGS

I tell your name, tell your age, your occupation, and what condition your business is in and how to promote it; tell you all about your wife, husband, sweetheart or lover, and how to win the love of any one you desire. I tell you of any move, journey, speculation, position or change of any kind which may be before you and how to act to obtain the best results. I tell you exactly what your acquaintances think of you, who to trust and who to shun. I tell you whom and when you will marry, if at all, and give their name, age, occupation and disposition. In short, I tell everything you called to find out, and that, too, without asking you a question or you speaking a word.

Hours 9 a. m. to 8 p. m.

MASSAGE & MANICURE

MME. C. SCHRADER, scientific Swedish massage parlors. Room 12, 113½ E. Pikes Peak.

Don't Pull Out the Gray Hairs

"Pull out one gray hair and a dozen will take its place" is an old saying, which is, to a great extent, true, if no steps are taken to stop the cause. When gray hairs appear it is a sign that Nature needs assistance. It is Nature's call for help. Gray hair, dull, lifeless hair, or hair that is falling out, is not necessarily a sign of advancing age, for there are thousands of elderly people with perfect heads of hair without a single streak of gray.

When gray hairs come, or when the hair seems to be lifeless or dead, some good, reliable hair-restoring treatment should be resorted to at once. Specialists say that one of the best preparations to use is the old-fashioned "sage tea" which our grandparents used. The best preparation of this kind is Wyeth's Sage and Sulphur Hair Remedy, a preparation of domestic sage and sulphur, scientifically compounded with later discovered hair tonics and stimulants, the whole mixture being carefully balanced and tested by experts.

Wyeth's Sage and Sulphur is clean and wholesome and perfectly harmless. It refreshes dry, parched hair, removes dandruff and gradually restores faded or gray hair to its natural color.

Don't delay another minute. Start using Wyeth's Sage and Sulphur at once and see what a difference a few days' treatment will make in your hair.

This preparation is offered to the public at fifty cents a bottle, and is recommended and sold by all druggists. Agents, the Robinson Drug Co.

Social Democrats Meet in Chemnitz

BERLIN, Sept. 12.—The greatest political gathering in point of numbers and in many respects the most important of the year, will begin at Chemnitz, Saxony, September 15, when the Social Democrats gather for their general meeting. Here officers will be elected, party differences adjusted and the plan of campaign for the ensuing year mapped out. Present indications are that the meeting will be marked by many sharp if not bitter contests.

All the party leaders, of whatever faction, deny the existence of any important differences of opinion within the party, but the resolutions looking to the changes of the party organization affirm it. Back of them, although no one in authority will admit it, lies a movement to take from the present leaders of the organization a great part of the power now vested in them by enlarging certain important committees, creating new checks upon existing executive officers and otherwise restricting the dominant faction in its conduct of party affairs.

The other resolutions refer to, in the main, internal party affairs. It is unlikely that any platform change of any moment will be made, all wings of the party being fairly united as to that, although differing as to methods of procedure. The enrolled members of the

Of this number, more than 130,000 are women. Every third voter who went to the polls at last January's election cast a Social Democratic ballot. The party, with 110 seats in the reichstag, has relegated to second place the clericals, for years the strongest party represented. It has, moreover, 225 delegates in the diets of the various German states.

RAYMOND'S DEATH THE RESULT OF VIOLENCE

CHICAGO, Sept. 12.—A. L. Raymond, known to the baseball public as "Bugs," came to his death from "internal hemorrhages and injuries to his brain due to external violence," according to a verdict of a coroner's jury today. Frederick Cigrank, 26 years old, was held to the grand jury accused of causing Raymond's death. Witnesses testified that Cigrank kicked Raymond into unconsciousness in a fight on September 1. Raymond was found dead in a downtown hotel last Saturday.

PREDICTS $500,000,000 POSTAL BUSINESS.

SENATOR JONATHAN BOURNE.

Five hundred million dollars' worth of business in the postoffice department every year, is the prediction of Senator Jonathan A. Bourne, chairman of the committee on postoffices and post roads. The postoffice under present conditions is self-sustaining. Congress appropriates the money for its operation, but the returns from postage, etc., bring the money back into the treasury. Senator Bourne contends that every development increasing the facilities opens up new sources of income, the postoffice department being the greatest business establishment in the world, in which every citizen is a stockholder.

SCOTTI PASSES UP ONE AMERICAN FOR ANOTHER.

Charlotte Ives, the American actress, has announced her engagement to Antonio Scotti, baritone of the Metropolitan Opera company of New York. She said the marriage would take place in New York as soon as arrangement could be made. The engagement has caused a stir both here and on the continent, because it marks the collapse of the long-loved rumor that the baritone would marry Geraldine Farrar, the famous American prima donna. The fact has given new interest to the sudden departure of Miss Farrar for Munich. Ill health was given as the reason for her trip, but of course there are now some who surmise, for the sake of chat, that there may have been a final understanding between the two singers, either friendly or otherwise.

PARENTS OPPOSED TO TEACHING SEX HYGIENE

DENVER, Sept. 12.—More than 400 Denver parents form every part of the city condemned the teaching of sex hygiene in the high schools of Denver when they signed and presented a petition yesterday to the school board demanding that the course in sex enlightenment be abolished on the grounds of its nonamericanism. The [illegible] to a special meeting of the board on Friday night.

The question of sex hygiene in the schools has agitated Denver parents and teachers since Mrs. Noble began her course with the young girls in the East Denver High school last year. Bitter warfare has been waged; the school board itself has split into factions over the question, and Denver mothers have declared that it was their own sacred privilege, and theirs alone, to enlighten their daughters on the secrets and mysteries of life.

Many petitions have been presented the school board in the past asking the abolishment of the course of instruction in sex hygiene, but the petition of yesterday represents the most pronounced and vigorous slap yet given this phase of educational work. These 400 parents indignantly maintain that the schools are usurping the duty and privilege of the home.

The school board quietly referred the petition for consideration at the next meeting of the board, being disinclined to discuss the proposition in the presence of reporters.

FAKE ORCHARD SCHEMES ABOUT TO BE EXPOSED

WASHINGTON, Sept. 12.—The department of agriculture, in a report soon to be issued, will sound a note of warning to all interested against orchard investment schemes that hold out promises of profits far in excess of what the department experts regard as warranted.

Many inquiries have reached the department regarding orange, apple and other enterprises where the orchardizing is to be done by proxy and in some instances the claims of profits are alluring in the extreme. It is possible that some of these claims will be called to the attention of the postoffice department, because of the circulation of such literature through the mails.

Not all the schemes are frowned upon by the department, as will be pointed out in the report. This document, based upon inquiry into a number of the plans, will give clear suggestions and hints to city folks who are considering making investments in so-called "orchardizing by proxy."

It will indicate the conditions under which such fruit culture may be carried out, and the reasons given by the government experts why certain system of orchardizing must fail.

"The safety of a passenger on English railways, as compared with that of the employes, is greater than that of an ordinary pedestrian compared with a steeplejack or a flying man. Last year, on the British railways, only one passenger was injured out of every 450,000 carried; but of the employes, one was injured out of every 1,500. In other words, the employe has 6,000 chances of losing his life to the passenger's one chance."

Western Oklahoma contains larger deposits of gypsum than any state in the Union. It has been estimated that there are 125,000,000,000 tons of this material in sight in the state.

SAYS SHE WAS FORCED TO DRUG AND ROB RICH MEN

CHICAGO, Sept. 12.—J. Paul Folsom, attache of the county clerk's office and brother of Master in Chancery Folsom, was arrested here following the confession of Gertrude Sutter, a pretty young stenographer employed as private secretary by State Senator John E. Madigan, in which she declared that Folsom sent her and another girl into the streets to lure, drug and rob his rich acquaintances.

The girl made these revelations after she had been arrested on a charge of robbing Oscar Bird, 4816 North Robey street. He identified her as the young woman who, after an evening of gaiety, had drugged and robbed him of $250.

[illegible] stenographer, repeated her confession, and accused Folsom.

"I did not want to do it," she sobbed. "But he made me. I have to do what he says."

"Are you his slave?" asked the judge.

The girl answered "Yes."

When arrested Folsom had in his pockets two woman's diamond rings and a pearl ring set with diamonds. He refused absolutely to discuss the charge against him.

The girl was arrested this morning still clothed in the handsome silken gown which had been used as a lure for Bird. She was held in $2,000 bonds and Folsom in $3,000. Both stayed in jail.

Miss Sutter, in a clear, girlish voice which contrasted with her weary eyes and her whitened cheeks, approached the bench and said:

"I didn't drug him. If anybody drugged him it was Folsom. I didn't want the money. Folsom wanted it. I had to get it for him."

ECONOMY OF SMALL COINS

From Philadelphia Record.

Primarily, of course, the motive for the proposed coinage of a three-cent piece was the institution of the three-cent rate of car fare in a number of cities. The utility of a coin of this denomination may be overestimated and a prejudice against it exists, born of past experiences. The little silver three-cent piece was undoubtedly a nuisance on account of its diminutive size, and the nickel coin, which succeeded it, was the cause of endless confusion through its close resemblance to a dime. The latter defect, however, would be completely remedied if the new coin, as has been suggested in its center, like a Chinese "cash."

The usefulness of the new coin would not be limited to the payment of car fares in cities which have the three-cent rate. It would be an incentive to many small economies. Numerous articles which now sell for a nickel would probably sell for 3 cents if a coin of that denomination were current. Prices are, to some extent, made by custom and habit. On the Pacific coast the "bit" was for many years the smallest unit of exchange and many articles of little value sold there for that price, which in the East could be had for a nickel. The Englishman pays two pence for a pint mug of beer, while here 5 cents is charged for a glass containing less than half that quantity. The difference in the cost of production in the two countries is incomparably less than the difference in price. A single cigar of the two-for-a-quarter kind costs 15 cents.

The examples might be multiplied indefinitely. A housewife will readily be able to think of hundreds of instances where a smaller divisor would save money for her when she goes marketing or shopping. And this would be all the more so if the other proposal, now before congress, to coin half-cents should also be adopted; for what is true of articles whose present price level is a nickel would also be true of things now usually sold for a cent. The small economies that could be thus effected are by no means negligible. Their sum total throughout the country would run into millions a year.

KNOWN AS THE CHAMPION VIPER KILLER

From the New York Sun.

Henri Anvray, popularly known as "Deen," the Viper Killer, holds the record for the destruction of the snakes which have recently infested certain districts of France. So great in fact has been the pest of vipers that various municipalities have voted sums of money to be distributed as prizes among the persons killing vipers.

In 1905, Henri Anvray, lured by the prizes offered by the people of Tonnerre, decided to make a profession of viper killing and went about the work in a serious manner. It was easy to kill a snake once in presence of it, but how to charm the snakes out of their hiding places was the question. Anvray studied their habits with such good results that in four months more than 1,500 vipers had been charmed and destroyed by him.

While his quick work restored the plains to their owners in a safe condition and prevented whole regions from being deserted, it almost bankrupted the municipality of Tonnerre, totally exhausting the funds voted for the destruction of vipers. So valuable were "Deen's" services to his compatriots, however, that the close-fisted councilmen voted a second sum in behalf of viper killing, and Anvray continued his profitable profession, killing more than 6,000 of the reptiles and making a world record for himself.

To see him charm a viper is a fascinating study. None seemed able to resist him, and he knows their haunts and habits as no one else knows them.

He makes a good income from his profession, 2,000 francs yearly, or enough to be happy and comfortable on in the country where he lives. He is a good looking if picturesque character, proud of his profession and of the renown that he enjoys.

FACTORY IN HOLLAND

From the San Francisco Chronicle.

A factory to produce artificial rubber has been established at Ymuiden, the port at the mouth of the North Sea canal. It is said that the company instituting this factory has succeeded in producing a substance having the qualities of rubber and also certain special advantages over genuine rubber.

The process is a secret, but the principal ingredient of the product is said to be fresh sea fish, which are brought to Ymuiden in vast quantities by the Dutch fishing fleets. According to report 15 to 16 per cent of natural rubber is added to the fish and the result is a substance as flexible and elastic as rubber, but much cheaper—about as 1.25 to 8 in price, compared with real rubber. The low price of this product will be caused partly by the byproducts which are possible, for it is said that much albumin will be made from the fish and that half of the factory is arranged for the manufacture of guano.

It is stated that this artificial rubber can be vulcanized in a short time; that it is benzine-proof and can resist the effect of heat. At first sight the substance much resembles real rubber. A slightly fishy smell betrays the chief ingredient, but it is explained that this will be prevented by extracting the fat of the fish.

"For some years hardtack has been pretty much cut out in the navy, although it makes a fine ration for hard work and active service. Several tons have been shipped down toward Cuba. Canned beans are good to stick to a marine's ribs and to keep out the bullets, so a few gross of cases of them have been rushed on to take the place of the little old-time navy beans which have to be soaked some hours to get them soft and well done. Canned beans are pretty good for marching.
